

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Azerbaijan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing about your background! It's great that you're thinking carefully about your next step. Since you've just finished primary school (in Denmark, that means *folkeskole* up to 9th or 10th grade), you're at an important point where you can choose a path that suits your interests, strengths, and future goals. Let me outline some options and factors to consider:

Main educational options after folkeskole in Denmark

Gymnasiale uddannelser (Upper secondary education preparing for higher education)

These are for students who want to go on to university or other higher education.

- **STX (Studentereksamen)** – broad and academic, with both sciences and humanities.
- **HHX (Higher Commercial Examination)** – focus on business, economics, and languages.
- **HTX (Higher Technical Examination)** – focus on technology, natural sciences, and innovation.
- **HF (Higher Preparatory Examination)** – shorter (2 years), more practical, good if you want flexibility or didn't take 10th grade.

Erhvervsuddannelser (Vocational education and training, VET)

- Combines school with apprenticeship/workplace training.
- Leads to skilled trades (e.g. electrician, carpenter, chef, hairdresser, IT-supporter).
- You can later take *EUX*, which combines VET with a qualification for higher education.

Other options

- **10th grade (optional)** – if you want a year to mature academically, figure out your plans, or improve in some subjects.
- **International programs** – if you're interested in global opportunities (e.g. International Baccalaureate).

How to choose?

Your interests and strengths

- Do you enjoy academic subjects like math, history, science, or languages? → Consider STX, HTX, HHX, or HF.

- Do you prefer practical, hands-on learning, and want to enter the job market sooner? → Consider VET or EUX.
- Are you interested in business and entrepreneurship? → HHX could be a good fit.
- Are you drawn to technology, engineering, or design? → HTX or a technical VET.

✅ Your long-term goals

- Do you see yourself going to university or college later? → Choose a gymnasial education or EUX.
- Would you like to work sooner and learn through doing? → Choose a VET program.

✅ Your learning style

- Do you prefer theory and books, or action and practice?

🌟 Some advice given your background

- Being fluent in Danish and having a multicultural background is a strength! You could thrive in international business, technology, or public service.
- If you're still unsure, a year in 10th grade or visiting open house events at schools can help you decide.
- Don't feel pressured to follow what your friends choose — focus on what *you* enjoy and where *you* want to be.

If you want, you can tell me:

- What subjects do you like most?
- What kind of work do you see yourself doing in the future (if you have any ideas)?
- Do you prefer schoolwork or practical activities?

Then I can give you a more tailored recommendation! 🚀
