

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Azerbaijan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thank you for sharing about yourself! It's great that you're thinking carefully about your next steps after finishing primary school (folkeskolen). In Denmark, you have several good options depending on your interests, strengths, and future plans. Let's break it down so you can think about what might suit you best.

Main educational paths after primary school in Denmark

1 Gymnasium (STX) – A broad, academically oriented upper secondary education that prepares you for university.

- ✓ Good if you enjoy subjects like languages, science, history, or social studies.
- ✓ Offers flexibility if you're not sure yet what you want to study at university.

2 HTX (Teknisk Gymnasium) – Focuses on technical and scientific subjects.

- ✓ Good if you like technology, science, and practical applications.
- ✓ Prepares you for technical university programs or engineering.

3 HHX (Handelsgymnasium) – Focuses on business, economics, and international trade.

- ✓ Great if you're interested in business, entrepreneurship, or economics.
- ✓ Also leads to university, especially business-related fields.

4 HF (Højere Forberedelseseksamen) – A shorter (2-year) upper secondary education, often for more mature students or if you want a more practical or flexible path.

- ✓ Good if you want to move on to higher education but prefer a slightly shorter program.

5 EUD / EUX (Erhvervsuddannelse) – Vocational education and training (apprenticeship + school).

- ✓ Good if you want to learn a trade (e.g. carpenter, electrician, chef).
- ✓ EUX combines vocational training with a high school diploma, so you can also go on to university.

How to choose?

 **Think about what you enjoy and are good at:** Do you like academic subjects? Practical work? Technology? Business?

 **Think about the environment you want:** Do you want more hands-on learning or more classroom/academic learning?

 **Consider your future dreams:** Do you want to go to university? Start working sooner?

Example recommendations

- If you like a **broad academic education and want to keep many doors open**, STX is a solid choice.
 - If you enjoy **science, technology, or engineering**, HTX could fit well.
 - If you're drawn to **business, trade, or international economics**, consider HHX.
 - If you want to **get into a job faster or work with your hands**, look at EUD/EUX.
-

Special bonus

Given your multicultural background, you might also consider:

- **Language lines** at STX (where you can use your Azerbaijani or other language skills as a strength).
 - **International opportunities** in HHX (business studies with a global focus).
-

 **If you want, tell me more about:**

- Your favorite subjects
- What you like doing in your free time
- Whether you see yourself going to university
... and I can give you even more specific advice!
