

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Azerbaijan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that about yourself! It's great that you're thinking carefully about your next step — that's a smart move. Since you've just finished primary school in Denmark (so you're around the end of *folkeskole*), you have several educational paths you can consider. Let's break it down based on your situation:

🎓 Main options after primary school in Denmark

1 Gymnasiale uddannelser (Upper secondary education) — Academic track

- **STX (Almen studentereksamen)** – The general upper secondary school, with a broad academic focus (humanities, science, social science, etc.).
- **HHX (Højere handelseksamen)** – Focuses on business, economics, marketing, international trade.
- **HTX (Højere teknisk eksamen)** – More focus on technical, natural sciences, technology.
- **HF (Højere forberedelseseksamen)** – A 2-year program that's a bit more practice-oriented, often chosen by people who want a shorter path to further education.

✅ *Choose this route if:*

You enjoy academic subjects, might want to go to university or professional higher education, or aren't sure yet what job you want.

2 Erhvervsuddannelser (Vocational education and training — EUD/EUX)

- Combines school and apprenticeship in a company.
- You can train for a specific profession (e.g. electrician, carpenter, hairdresser, chef, health care assistant, IT-supporter).
- **EUX** allows you to get both a vocational qualification and academic subjects so you can still go to university or college.

✅ *Choose this route if:*

You prefer practical, hands-on work and want to start working and earning sooner, or you're interested in combining work and study.

3 Other paths

- **10th grade:** If you're unsure, many students take an extra year in 10th grade (either at a *folkeskole*, *efterskole* or *produktion-skole*) to mature, explore interests, or improve grades.
- **Efterskole:** A boarding school for 1 year where you can combine academics with personal development, sports, arts, or other interests.

✓ Choose this route if:

You feel you need more time to decide, want to improve specific subjects, or want a special experience (e.g. living away from home).

How to decide?

Ask yourself:

- Do I like working with theory, reading, writing essays — or do I prefer practical, hands-on tasks?
- Do I have a dream job or area of interest already?
- Would I enjoy being in a school environment for 2-3 more years, or would I rather try working while learning?

Suggestion based on what you've shared

Since you're fluent in Danish, have finished primary school, and are thinking ahead — I'd suggest:

- If you like academic subjects: **STX, HHX, or HTX** (depending on whether you like general knowledge, business, or technology).
- If you like practical learning: **EUX** can be a great option — gives you both vocational training and the opportunity for further study.
- If you want to explore yourself and gain experiences: **efterskole for 10th grade** can be a fantastic, unique year.

Final tip:

Visit open house events (*åbent hus*) at local schools, talk to guidance counselors (*UU-vejleder*), and maybe do a short internship (*brobygning* or *praktik*) to see what feels right!

If you'd like, you can tell me more about:

- What subjects you like most?
- What your hobbies or interests are?
- Any careers you're already curious about?

And I can give you a more specific recommendation! 😊
