

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Azerbaijan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background — it helps me give you thoughtful advice! Since you're 16 and have completed primary school in Denmark, you're now likely looking at **youth education options (ungdomsuddannelse)**. Let's break it down so you can consider what suits your interests, strengths, and future goals.

Main educational paths after primary school in Denmark

Gymnasiale uddannelser (general upper secondary education)

These programs prepare you for higher education (university, etc.) and are mostly academically focused.

- **STX (studentereksamen)** – Broad academic subjects (humanities, natural sciences, social sciences)
- **HHX (higher commercial examination)** – Focus on business, economics, and international trade
- **HTX (higher technical examination)** – Focus on technology, natural sciences, and technical subjects
- **HF (higher preparatory examination)** – A 2-year program, often for students who want a shorter upper secondary path or didn't take the traditional route

Erhvervsuddannelse (vocational education and training, EUD)

Combines school and apprenticeship in a company. Good if you want to enter the job market earlier and learn a trade or craft (e.g., carpenter, electrician, chef, IT-supporter).

Kombinerede forløb

- **EUX** – Combines vocational education with subjects that qualify you for higher education (best of both worlds).

Things to consider

- ✓ **Your interests** – Do you enjoy academic subjects, practical work, or a mix?
- ✓ **Your strengths** – Are you better at theory, hands-on tasks, working in teams, or independent study?
- ✓ **Your goals** – Do you think you'll want to study at university? Or would you rather enter the job market sooner?
- ✓ **Language skills** – You're fluent in Danish, so all options are open! If you also speak Azerbaijani or other languages, that could be a strength in international business or trade.

Example scenarios

- 💡 *If you like broad academics and think about university:*
→ **STX** is a solid choice, gives the widest access to university programs.
- 💡 *If you're interested in business or want to work internationally:*
→ **HHX** could be great, especially with your multicultural background.
- 💡 *If you're into technology, science, or engineering:*
→ **HTX** will give you a good foundation.
- 💡 *If you want to learn a trade but keep the option for university:*
→ **EUX** is very practical and flexible.
- 💡 *If you're not sure and want a shorter, flexible academic path:*
→ **HF** might suit you, especially if you want to test things out.

⚡ My recommendation:

Since you're still exploring options, **visit open house events (åbent hus)** at local schools — they're designed to help students like you decide. Also, talk to a **studievejleder (guidance counselor)** who can help match your interests with the right program.

If you want, you can tell me:

- What subjects do you enjoy most?
- Do you have a dream career or area of interest?
- Do you prefer academic study or practical, hands-on work?

I can then help you narrow down the best fit! 🚀
