

Uddannelsesmuligheder efter Folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Azerbaijan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background — it sounds like you're at an exciting turning point! Since you've just finished primary school (which in Denmark typically means **Folkeskole** up to 9th or 10th grade), the next step depends on your interests, strengths, and goals. Let's break down your options and what you might consider:

🎓 Main educational pathways after Folkeskole

In Denmark, you generally have these options:

✅ Gymnasiale uddannelser (upper secondary education) — more academic/theoretical

- **STX (Almen studentereksamen)** – broad academic focus, good for university preparation
- **HHX (Højere handelseksamen)** – focus on business, economics, and languages
- **HTX (Højere teknisk eksamen)** – focus on technology, natural sciences, and innovation
- **HF (Højere forberedelseseksamen)** – shorter (2 years), more mature environment, often for those wanting a more practical or flexible route to higher education

✅ Erhvervsuddannelser (vocational education) — more practical/apprenticeship-based

- Combines school and work experience
- You get trained for a profession (e.g. electrician, carpenter, chef, hairdresser, health care assistant)
- You can later build on this and take further education if you want

✅ Kombinationsforløb

- Some schools offer combination programs where you can try both vocational and academic subjects before deciding

🕒 How to choose? Ask yourself:

- Do I enjoy theoretical subjects like history, science, literature? → **Gymnasiale uddannelser**
- Am I drawn to practical tasks, hands-on work, earning while learning? → **Erhvervsuddannelse**
- Do I have a clear career dream (doctor, engineer, entrepreneur)? → Pick the route that prepares for that
- Would I like to keep options open for university later? → **STX, HTX, HHX** keep doors open

☀️ Other factors to consider

- Where do your strengths lie — maths, languages, practical work, arts?
 - What environment suits you — classroom-based learning or learning-by-doing?
 - Are you motivated by structure or freedom?
 - How long do you want to study before starting work?
-

🤔 Example ideas based on interests

- **If you like science, technology:** HTX could be great
 - **If you like business or languages:** HHX
 - **If you want to keep it broad and academic:** STX
 - **If you want to work sooner and learn practically:** choose a vocational track
 - **If you're unsure:** You could consider 10th grade or a combination program
-

🌱 Extra tip

Since you have roots in Azerbaijan, you might think about how your language and cultural background could become a strength — e.g., in international business, diplomacy, or working with multicultural communities.

👉 Final recommendation:

If you'd like, tell me:

- What subjects do you enjoy most?
- Do you see yourself going to university eventually?
- Do you prefer practical or academic learning?
- Any career ideas or dreams yet?

I can then give a more personal recommendation!
