

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bahamas. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful question, and it's great that you're thinking carefully about your next steps! Since you're 16 and just finished primary school (which in Denmark typically means you've completed *folkeskole* up to 9th or 10th grade), you have several good options depending on your interests, strengths, and future goals. Let's break it down.

Main educational paths after primary school in Denmark

Gymnasium (general upper secondary education)

- Examples: *STX*, *HHX*, *HTX*
- Duration: 3 years
- For: If you enjoy academic subjects and might want to go to university.
- Focus:
 - *STX*: broad academic program (languages, sciences, humanities)
 - *HHX*: business, economics, and marketing
 - *HTX*: technology, science, IT

EUD / erhvervsuddannelse (vocational education and training)

- Duration: 2-5 years (depending on program)
- For: If you want practical training, apprenticeship, and start working sooner.
- Focus: crafts, trades, hospitality, IT, health care, etc.
- You can also combine this with a *EUX*, where you get both vocational training and academic qualifications that allow university entry.

International or alternative programs

- International Baccalaureate (IB)
- Efterskole for a year (if you didn't do that yet)
- Specialized schools (arts, music, sports, etc.)

☀️ How to choose?

Since you're fluent in Danish and have multicultural roots, you might also think about:

- ✓ What subjects excite you most — languages, science, business, technology, arts?
- ✓ Do you prefer academic study or hands-on/practical work?
- ✓ Do you see yourself wanting to go to university later? Or start working sooner?
- ✓ Do you want to study abroad at some point? (Then STX, IB, or EUX might be good paths.)

Example paths based on interests

- **Interested in science & technology** → HTX
- **Interested in business & economics** → HHX
- **Want a broad academic education** → STX
- **Want practical skills + work opportunities** → EUD or EUX
- **Want an international perspective / possibly study abroad** → IB

Your background

Having parents from the Bahamas gives you a cool opportunity to explore global perspectives. If you're interested in international careers, IB or HHX could be particularly valuable. Your Danish fluency means all options are open to you.

⚡ Suggestion:

If you want, I can help you:

- Create a list of specific schools near where you live.
- Compare STX, HHX, HTX programs in your area.
- Look at entry requirements or application deadlines.

Would you like help with that? And can you tell me:

- 👉 What subjects do you enjoy most?
- 👉 Do you think you'd prefer practical work or more academic study right now?
