

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bahamas. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next step! Since you're 16 and have completed primary (or *folkeskole*) in Denmark, you're at an important point where you can choose the kind of upper secondary education that fits your interests, strengths, and future goals.

Let's break down your options and what might suit you, given your background:

📌 Typical educational paths after primary school in Denmark

1 STX (Almen Gymnasium)

- Focuses on general academic subjects like languages, sciences, and social studies.
- Good if you enjoy a broad range of subjects and might want to go to university later.

2 HHX (Higher Commercial Examination)

- Focuses on business, economics, marketing, and languages.
- Great if you're interested in commerce, entrepreneurship, or international business.

3 HTX (Higher Technical Examination)

- Focus on technology, natural sciences, IT, and innovation.
- Ideal if you like science, technology, and practical problem-solving.

4 HF (Higher Preparatory Examination)

- Shorter (2 years), more focused on adults or those wanting a more flexible academic route.
- Suitable if you prefer a less traditional gymnasium route and maybe want to go to university college.

5 EUD/EGU (Vocational education and training)

- Combines school and apprenticeship (praktik).
- Great if you prefer hands-on learning and want to qualify for a specific trade (e.g. carpenter, chef, electrician).

🔑 What to consider based on your background

✓ **You're fluent in Danish** → All options are open to you in terms of language of instruction.

✓ **Your cultural background (Bahamas/Danish)** → If international perspectives or languages interest you, HHX or STX could be attractive, as they often offer good opportunities for international exchange or business studies.

✓ **Your interests?**

- Do you like academic subjects (math, science, literature)? → STX or HTX.
- Interested in business, marketing, or languages? → HHX.
- Prefer practical, hands-on work? → EUD.
- Unsure or want more flexible access to higher ed? → STX is the most general.

Personal recommendation

Since I don't know your specific interests yet, here's a general suggestion:

👉 **If you enjoy schoolwork and want to keep doors open for university:**

STX is a solid, flexible choice with many study lines (science, social science, languages, arts).

👉 **If you're curious about business and international opportunities:**

HHX might fit you well — and it could tie nicely with your Bahamian-Danish background and a future career in international trade or tourism.

👉 **If you're into technology, IT, or natural sciences:**

HTX gives you a more practical-scientific angle.

👉 **If you prefer to work with your hands or have a specific trade in mind:**

EUD is great for getting into a profession faster.

Next steps

 Reflect on:

- What subjects do I enjoy most?
- Do I see myself at university, or would I prefer to work sooner?
- Do I like theory, practice, or a mix of both?

🔴 **Tip:** Most schools offer open house events (*åbent hus*) — consider visiting a few gymnasiums or vocational schools to see what feels right!

If you want, I can help you:

- Make a pros/cons list for your top choices
- Explore specific schools in your area
- Find programs with international focus

👉 Would you like to tell me what subjects you like best or what careers you've thought about? That would help me give a more tailored recommendation!
