

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bahamas. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's fantastic that you're already reflecting on your next steps! Let's break it down so I can give you recommendations tailored to your situation.

Your context

- ✓ 16 years old
- ✓ Finished primary school (I assume this means *folkeskole*, 9th or 10th grade)
- ✓ Fluent in Danish
- ✓ Danish-born with Bahamian roots

What are your main options in Denmark after primary school?

In Denmark, after folkeskole, you generally choose between different *ungdomsuddannelser* (youth education programs):

Gymnasiale uddannelser (General upper secondary education)

These prepare you for university later.

- **STX (Alment gymnasium)** – Broad, academic focus (languages, humanities, sciences)
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, and innovation
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international trade
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), for those wanting more practical access to higher education

 *Good if you like studying, want to keep doors open for university, and aren't sure yet what to specialize in.*

Erhvervsuddannelser (Vocational education and training, VET / EUD)

Combination of school + apprenticeship in a company.

- Examples: carpenter, chef, electrician, hairdresser, IT support, social- and healthcare worker

 *Good if you want to start working sooner, like learning by doing, and want a specific skilled job.*

Other paths

- **Kombineret ungdomsuddannelse (KUU)** — For young people who need more support finding their path
- **Produktionsskole/FVU/ordblindeundervisning** — If you need to strengthen basic skills

How to choose?

Ask yourself:

- ✓ Do I enjoy academic learning, or prefer practical, hands-on work?
- ✓ Do I already have a dream career, or want to keep my options open?
- ✓ Do I want to go to university later?
- ✓ What subjects excite me most (e.g. science, business, technology, art)?

My suggestion for you

Since:

- You're fluent in Danish
- You've finished primary school
- You probably have strong cultural flexibility (Danish + Bahamian background)

If you're unsure but want to keep university options open:

- **STX** (most general, flexible)
- **HTX** (if you like tech/science)
- **HHX** (if you're interested in business/economics)

If you already have a trade or career idea:

- **EUD** in that field

If you want a middle path / shorter program:

- **HF**

Bonus idea

Given your Bahamian roots, perhaps think about an international angle too:

- Choose English or Spanish as a language at gymnasium
- Later explore exchange programs, e.g. through *Afs* or *Erasmus*

Next step

- Visit uddannelsesguiden.dk (UG.dk) and take their "valg af ungdomsuddannelse" test
- Go to open house events at local gymnasiums and vocational schools
- Talk with your *UU-vejleder* (youth guidance counselor)

👉 If you want, tell me:

- What subjects do you like best?
- Do you think about going to university?
- Do you prefer working with your hands or at a desk?

Then I can make an even more precise recommendation! 🚀
