

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bahrain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and exciting moment in your life—congratulations on completing primary school! Let's break it down so you can consider the options and make a choice that suits *you*, your interests, and your future ambitions.

Key considerations

- **What are your interests?** (e.g. sciences, arts, languages, technology, business, hands-on work)
- **How do you like to learn?** (academic/theoretical vs. practical/hands-on)
- **Do you want to go to university?**
- **Are you eager to start working earlier, or do you want to study longer?**
- **Are you open to international opportunities in the future?**

Main educational paths after primary/lower secondary school (Folkeskole) in Denmark

Since you're 16, you're likely deciding between these typical paths:

1 Gymnasium (STX, HHX, HTX, or HF)

These are upper secondary academic programs that last 2-3 years and qualify you for higher education (university, university colleges).

- **STX (Alment gymnasium)** – broad and general education, with many subjects (humanities, sciences, languages)
- **HHX (Handelsgymnasium)** – focus on business, economics, marketing
- **HTX (Teknisk gymnasium)** – focus on science, technology, IT
- **HF (Højere forberedelseseksamen)** – a 2-year program, more practical, for those who want a shorter path to higher education

 *Good if you want to keep doors open for university, and if you enjoy academic subjects.*

2 EUD (Erhvervsuddannelse / vocational education)

A combination of school and apprenticeship. You learn a trade (e.g. carpenter, electrician, hairdresser, chef) and work as an apprentice in a company.

 *Great if you prefer hands-on work and want to start earning money earlier.*

3 **EUX (a mix of vocational and academic)**

This is a combination where you get both a vocational qualification and a gymnasium-level exam that allows you to apply for university.

✓ *Perfect if you want a profession, but also want to keep the option for higher education open.*

⚡ **My recommendation based on what you shared**

→ **If you enjoy learning, are curious, and want to keep many doors open:** Consider **STX**, **HHX**, or **HTX**, depending on your interest in subjects.

→ **If you want practical skills and job opportunities earlier, but still want the option of further study:** **EUX** is a smart choice.

→ **If you know for sure you want a trade:** go for **EUD**.

🌍 **Extra tip**

Since you have a multicultural background (Denmark + Bahrain), you could look for programs or schools that have international focus (e.g. schools that offer additional language options, study abroad opportunities, or international business programs like HHX).

📌 **Next steps**

✓ Visit open house events (åbent hus) at local schools to get a feel for them

✓ Talk to a guidance counselor (vejleder) at your school or at the **Ungdommens**

Uddannelsesvejledning (UU)

✓ Think about your dream for the future — no pressure to decide everything now, but think about what sounds fun and meaningful

If you tell me more about your interests (e.g. do you like math, technology, art, languages?), I can give you a more tailored suggestion!

Would you like help making a list of pros/cons for specific paths? Or ideas for careers that fit your strengths? 😊
