

# Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bahrain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you've finished primary school (folkeskolen) in Denmark at 16, you're now at a point where you can choose between several educational paths depending on your interests, strengths, and long-term goals. Let's break it down:

## Main educational options after primary school in Denmark

### Gymnasiale uddannelser (general upper secondary education)

These are good if you want to keep your options open for university later:

- **STX (studentereksamen)** – general upper secondary school, broad focus with languages, sciences, and culture.
- **HHX (højere handelseksamen)** – focus on business, economics, and international trade.
- **HTX (højere teknisk eksamen)** – focus on technology, natural sciences, and innovation.
- **HF (højere forberedelseseksamen)** – a shorter 2-year programme, more practical, often chosen by those who want to move on to professional bachelor programmes.

 **Best if:** You enjoy academic subjects and think you might want to go to university.

### Erhvervsuddannelser (vocational education and training / VET)

You combine school with apprenticeship in a company (praktikplads). Examples:

- Electrician, carpenter, chef, IT support, health care assistant, etc.

 **Best if:** You want to work with something hands-on, and you're eager to get work experience while you study.

### Kombineret uddannelse (EUX)

This combines vocational training with gymnasiale level subjects so you can both learn a trade and qualify for university.

 **Best if:** You want a practical education but also want to keep the door open to higher education.

## Things to consider when choosing

- What subjects do you enjoy most? (Math, science, languages, art, technology, business?)

- Do you prefer academic study or hands-on work?
- Are you interested in university later on or would you rather start working sooner?
- What's your learning style? (Do you like projects, teamwork, theory, practice?)

### ⚡ Example paths based on interests:

- 💡 *Interested in science/tech?* → HTX or EUX tech direction
- 💡 *Interested in business?* → HHX or EUX business
- 💡 *Interested in languages/culture?* → STX
- 💡 *Interested in crafts or practical work?* → VET or EUX
- 💡 *Unsure, but want to keep options open?* → STX or EUX

### 📝 My suggestion:

Since you're fluent in Danish and already familiar with the Danish school system, choose **the path that aligns best with your interests** and keeps your future options open *if you're still exploring*. STX or EUX could be excellent choices — STX if you prefer academics, EUX if you want a mix of school and practical experience.

If you want, tell me:

- What subjects do you enjoy most?
- Do you have any idea of a dream job or field?
- Would you like to study at university in the future?

I can help narrow it down further! 🚀
