

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bangladesh. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing about yourself — that helps me give you thoughtful advice! Since you're 16, fluent in Danish, and have just finished primary school in Denmark (likely **folkeskolen** or a similar program), you're at an important crossroads. Let's break it down so you can choose a path that suits your interests, strengths, and future plans.

Common educational options after primary school in Denmark

Here are the typical routes Danish students consider:

1 Gymnasiale uddannelser (Upper secondary education for academic studies)

These prepare you for university and higher education:

- **STX (Almen studentereksamen)** – Broad general education, with subjects like languages, social studies, science. Good if you're interested in many subjects.
- **HHX (Higher commercial examination)** – Focus on business, economics, and international trade. Great if you like business, marketing, or management.
- **HTX (Higher technical examination)** – Focus on technology, natural sciences, IT, and engineering. Ideal if you like math, science, or technical subjects.
- **HF (Higher preparatory examination)** – Shorter (2 years) and more flexible, aimed at those who want a faster route to higher education or need a different learning style.

2 Erhvervsuddannelser (Vocational education and training, EUD)

- Combines school with apprenticeship in a company.
- Leads to a skilled trade (e.g. electrician, carpenter, chef, healthcare assistant).
- Good if you want to start working sooner or enjoy practical learning.

3 Combination programs

- **EUX** – Mixes vocational training with academic subjects, so you can both get a skilled trade and qualify for higher education.

Things to consider

✓ **Your interests:**

Do you enjoy academic subjects, practical tasks, creative work, or working with people?

✓ **Your strengths:**

Do you thrive in theory-heavy subjects, or prefer hands-on work?

✓ **Future ambitions:**

Do you want to go to university later? Start working as soon as possible? Maybe start a business one day?

✓ **Cultural and personal factors:**

Your background (e.g., language, community expectations) can help shape your goals — but remember, the path should match **your** passion and potential!

Example recommendations:

👉 If you're unsure what you want yet and want to keep doors open:

STX or HHX — these give broad qualifications and time to explore.

👉 If you love science/tech:

HTX — a great foundation for engineering, IT, or science fields.

👉 If you like business or plan to work internationally:

HHX — plus your multilingual and multicultural background is a big asset!

👉 If you prefer to learn by doing and want a faster route to a job:

EUD or EUX — for example, becoming a skilled IT supporter, media technician, electrician, etc.

👉 If you want a more flexible academic route and think 3 years of gymnasium is too much:

HF — shorter, and often a better fit for students who prefer a more direct approach to education.

☀ **My advice:**

Since you're fluent in Danish and have completed school here, you have every opportunity open. I recommend:

👉 **Make an appointment with an educational counselor (UU-vejleder)** — they can help you choose a program and school that fits you.

👉 **Visit open house events at gymnasiums or vocational schools** — to get a feel for the environment.

👉 **Talk to people in jobs that interest you** — family, friends, or even through school.

If you'd like, I can help you:

✓ Make a **pros/cons list** for specific paths

✓ Explore career ideas based on your interests

✓ Draft a plan for the next 2-5 years

Would you like help with that? Or do you already have some ideas about what you enjoy? 😊
