

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bangladesh. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that background! It's great that you're thinking carefully about your next step after primary school. In Denmark, at 16, you have several good options depending on your interests, strengths, and future goals. Let me break it down for you:

🎓 Main educational paths after primary school (folkeskole)

1 Gymnasiale uddannelser (upper secondary education / general education)

These prepare you for university or higher education.

- **STX (studentereksamen):** Broad, academic focus with lots of subjects (languages, science, social studies).
- **HHX (higher commercial exam):** Focus on business, economics, marketing.
- **HTX (higher technical exam):** Focus on technology, natural sciences, innovation.
- **HF (higher preparatory exam):** Shorter (2 years), good if you want a more flexible or practical academic path.

👉 **Good if** you're aiming for university or higher education later.

2 Erhvervsuddannelser (vocational education and training)

Combine school and apprenticeship (praktik) in a company. You'll qualify for jobs directly or can later go on to further studies (e.g., erhvervsakademi, professionsbachelor).

- Examples: electrician, carpenter, IT-supporter, social and health assistant, chef.

👉 **Good if** you like practical work and want to start earning sooner.

3 Kombinerede forløb (e.g., eux)

A combination of vocational education and gymnasial education — you get both a trade qualification and the right to apply to higher education.

👉 **Good if** you want to keep both doors open (work and university).

☀️ What to think about when choosing

- ✓ What subjects do you enjoy most?
 - ✓ Do you prefer hands-on work, or academic learning?
 - ✓ Are you already thinking of a career (e.g., doctor, engineer, entrepreneur, designer)?
 - ✓ How much flexibility do you want to change paths later?
-

Example scenarios

- If you enjoy science and technology → HTX could be a great fit.
 - If you're passionate about business or want to start your own company → HHX is a solid choice.
 - If you want broad options for university and don't yet know what you want → STX or HF.
 - If you love practical work (e.g., building things, helping people) → Erhvervsuddannelse or EUX.
-

Final tip

In Denmark, it's normal to take time to explore. You can also talk to an **UU-vejleder (youth guidance counselor)** — they can help match your interests to the right path. And remember, no decision is final — you can switch later!

If you'd like, I can help you:

- **Make a list of specific schools or programs near you**
- **Compare STX/HHX/HTX/HF in more detail**
- **Explore job ideas based on your interests**

Do you already have subjects or areas that interest you? 😊
