

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Barbados. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's wonderful that you're thinking carefully about your future! In Denmark, finishing *folkeskole* at around age 16 opens up several different educational paths depending on your interests, strengths, and future goals. Let's break it down so you can consider your options:

🎓 Main educational paths after primary school in Denmark

1 Gymnasiale uddannelser (General upper secondary education)

If you're interested in academic studies and might want to go to university, this is the typical choice. There are several types:

- **STX (Alment gymnasium)** – The most common, broad academic program with focus on humanities, sciences, and social studies.
- **HHX (Handelsgymnasium)** – Focuses on business, economics, and international studies.
- **HTX (Teknisk gymnasium)** – Emphasis on technology, natural sciences, and technical subjects.
- **HF (Højere forberedelseseksamen)** – A shorter 2-year program, often chosen by those who want a more practical/alternative route to higher education.

💡 Consider if:

You like academic subjects, want flexibility, and might want to go to university later.

2 Erhvervsuddannelser (Vocational education and training, VET)

If you'd rather combine school with hands-on work experience, this could be for you. You'll train for a specific trade, like:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Health care worker
- and many more!

💡 Consider if:

You prefer practical learning, want to get a job more quickly, and like the idea of apprenticeships.

Kombinerede forløb (Combination programs)

There are options like **eux**, which combines vocational education with upper secondary subjects — so you can get both practical skills and qualify for university.

Consider if:

You're unsure whether you want to work soon or study further — it keeps both doors open.

Other things to think about

- Since you're bilingual and have Caribbean roots, you could look for programs that emphasize languages, international studies, or global business — for example, HHX or STX with a focus on languages/social sciences could fit well.
- Denmark has many exchange and international opportunities — consider programs that offer that if you're interested in connecting with your heritage in Barbados or seeing more of the world.
- What are your interests? (e.g. science, arts, business, technology, helping people?) Your interests should guide your choice.

My recommendation:

👉 If you enjoy school subjects and are open to university later: **STX** or **HHX** could be great — STX if you want broad academic options, HHX if you're drawn to business/economics.

👉 If you're more practical, like learning by doing, and want job skills sooner: **Vocational education** or **EUX** would be strong paths.

If you'd like, tell me:

- What subjects you enjoy most?
- What kind of career or lifestyle you imagine for yourself?
- Do you prefer classroom learning, hands-on, or a mix?

I can help you narrow it down even more! 🚀
