

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belarus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question—thank you for sharing about yourself! Since you're 16, just finished primary school (which in Denmark likely means *folkeskolen* up to 9th or 10th grade), you're now at an important point where you can choose between several educational paths depending on your interests, strengths, and future goals.

Here's an overview of the main options in Denmark, along with recommendations based on what might suit different preferences:

Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in continuing with academic studies and perhaps going to university later, one of these programs might be right for you:

✓ **STX (Studentereksamen)** – Broad and general education (humanities, science, social science). Good if you want flexibility later.

✓ **HHX (Higher Commercial Examination)** – Focuses on business, economics, and international trade. Ideal if you're interested in business, marketing, or economics.

✓ **HTX (Higher Technical Examination)** – Focuses on science, technology, and engineering. Perfect if you're into technology, IT, science, or design.

✓ **HF (Higher Preparatory Examination)** – A 2-year program (instead of 3), often for those who want a faster route to higher education or need a more practical focus.

Recommended if:

You enjoy academic subjects, want to keep doors open for university or other higher education, and are comfortable with schoolwork.

Erhvervsuddannelser (Vocational Education and Training / VET)

If you prefer hands-on learning, want to start working sooner, or like the idea of combining school with an apprenticeship:

✓ **EUD (Vocational training)** – You train for a specific job (e.g., electrician, chef, mechanic, carpenter, hairdresser). You spend time in school and as an apprentice in a company.

✓ **EUX** – Combines vocational training with subjects from the gymnasiale programs. You can both get a skilled trade and qualify for higher education.

👉 Recommended if:

You like practical work, want to enter the workforce earlier, or want a mix of practical skills and academic qualifications (EUX).

🏠 Other considerations

- **International programs:** With your Belarusian background, maybe you're interested in an International Baccalaureate (IB)? This can open doors globally, and it's offered in some Danish schools.
 - **Folk high schools / efterskole / 10th grade:** If you feel unsure, you could consider a 10th grade year, or a *højskole* or *efterskole* stay, where you can explore interests, mature personally, and decide on your path.
-

📌 My suggestion:

Since you're fluent in Danish and have grown up in Denmark, you have full access to all these options. Think about:

- Do you enjoy theoretical/academic subjects, or prefer practical work?
- Do you want to go to university, or start a career sooner?
- Are there specific areas (science, business, design, social science) that excite you?

👉 If you want to keep many doors open: **STX or HHX or HTX**

👉 If you want to work with your hands and start earning earlier: **EUD or EUX**

🌟 Next steps

If you'd like, tell me:

- What subjects do you like most in school?
- Do you have a dream job or field?
- Do you enjoy hands-on work or more academic work?

That way I can give you a more personal recommendation! 😊
