

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belarus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's awesome that you're reflecting on your future at this stage! Let's break it down thoughtfully, based on your situation and the options available in Denmark.

## 🎓 Educational paths after primary school in Denmark

Since you've completed *folkeskole* (or primary school), here are the main options typically available to you:

### 1 Gymnasiale uddannelser (Upper Secondary Education)

These prepare you for university studies. Types include:

- **STX (Alment Gymnasium)** – broad, academically oriented, focuses on humanities, social sciences, and natural sciences.
- **HHX (Handelsgymnasium)** – focused on business, economics, and international trade.
- **HTX (Teknisk Gymnasium)** – emphasizes technology, science, and applied subjects.
- **HF (Højere Forberedelseseksamen)** – a shorter, more flexible 2-year option, often for those who want a more practical or alternative academic path.

### 2 Erhvervsuddannelser (Vocational Education and Training - VET)

This is for you if you want to combine school and apprenticeship and go directly into a trade (e.g. electrician, carpenter, chef, health care worker).

### 3 Kombinerede uddannelser (EUX)

A mix of vocational training and upper secondary school, so you can both learn a trade and qualify for university.

## 💡 How to choose?

Ask yourself:

- ✓ What subjects do I enjoy most?
- ✓ Do I prefer theoretical learning or practical, hands-on work?
- ✓ Do I want to go to university later, or would I rather learn a trade and start working earlier?
- ✓ How do I learn best — through books and lectures, or through doing and creating?

## 📌 Recommendation based on your profile

- 👉 Since you're fluent in Danish, born and raised in Denmark, you have all doors open.
  - 👉 If you enjoy school and think you might want to go to university, *STX* or *HHX* could be great — *STX* for a broad academic foundation, *HHX* if you're interested in business or international relations (which could tie nicely with your Belarusian heritage).
  - 👉 If you're more into science, technology, or engineering, *HTX* would suit you.
  - 👉 If you prefer practical learning but still want the option of higher education later, *EUX* is a really smart path.
- 

### **Final advice**

It's normal not to know exactly what you want at 16. My suggestion:

- Visit open house events at different schools (*åbent hus*).
- Talk to a *UU-vejleder* (youth guidance counselor) — they can help tailor advice to you.
- Consider doing a short internship or job shadowing if you're unsure.

If you'd like, I can help you:

- ✅ Make a comparison table of the options
- ✅ Suggest specific programs in your local area
- ✅ Or explore how you can combine your Danish and Belarusian background (e.g. language, international studies)

Would you like help with that? Or do you want to tell me more about your interests? 😊
