

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belgium. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you're 16, fluent in Danish, and have completed primary (or likely *folkeskolen*) in Denmark, you have several good options depending on your interests, strengths, and future ambitions. Let's break it down:

Your main educational options in Denmark after primary school

In Denmark, after *folkeskolen*, you typically choose between:

Gymnasiale uddannelser (Upper secondary general education)

These are aimed at preparing you for higher education (university or other advanced studies):

- **STX (Studentereksamen)** – Broad academic program with sciences, humanities, and languages.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international studies.
- **HTX (Higher Technical Examination)** – Focus on technology, science, and IT.
- **HF (Higher Preparatory Examination)** – Shorter program (2 years), often for students who want a more flexible path or had a break in schooling.

Erhvervsuddannelse (Vocational education and training - VET)

- If you prefer hands-on learning and want to work in a specific trade (e.g., carpenter, electrician, chef, graphic designer).
- You can later pursue higher education through *EUX* (combines VET with academic studies) or other routes.

Questions to consider

To choose the right path, think about:

- ✓ Do you enjoy academic subjects (e.g., languages, history, math, science)?
- ✓ Are you interested in practical, hands-on learning, or do you prefer theoretical studies?
- ✓ Do you see yourself going to university or starting a career sooner?
- ✓ Are you interested in business, technology, arts, sciences, or something else?

My general recommendation

Since you are bilingual/bicultural (Danish + Belgian background), that's a strength!

👉 If you're interested in keeping doors open for university and aren't sure yet what to specialize in, **STX** is a very flexible choice.

👉 If you like business, economics, or international trade, **HHX** could fit well — especially with your Belgian roots, you might enjoy international aspects.

👉 If technology and science excite you, **HTX** offers a great foundation.

👉 If you prefer practical learning, **EUX** could be an excellent way to combine vocational training with the option of future studies.

Bonus thought

Because of your Belgian heritage, you might also consider:

- Taking language courses (French, Dutch/Flemish, or German) to strengthen ties with Belgium.
- Exploring exchange opportunities or programs that allow international experience later.

If you'd like, I can help you:

- ✓ Compare these pathways in detail.
- ✓ Look at specific schools in your region.
- ✓ Help plan towards university or career goals (in Denmark or abroad).

Would you like help narrowing it down based on your interests? What subjects do you enjoy most? 🚀
