

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Benin. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it helps give a clearer picture of where you're at. Since you're 16, just finished primary school, and live in Denmark, you're at a key transition point in your education. Here are your main educational options in Denmark, along with some guidance to help you choose the right path based on your interests, strengths, and goals.

🎓 Your Options After Primary School (Folkeskole)

In Denmark, after 9th or 10th grade, students typically choose one of these three paths:

1. Gymnasiale Uddannelser (Upper Secondary Education - Academic)

This is the route if you think you might want to go to university later.

- **STX (Studentereksamen)** – General upper secondary school. Broad academic subjects (humanities, natural sciences, social sciences).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and languages.
- **HTX (Higher Technical Examination)** – Focus on technology, natural sciences, and IT.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more flexible, and good if you want to go to university but prefer a lighter or alternative study style.

👉 **Best for you if:** You enjoy academic subjects, think you might want to go to university, and like learning in a classroom.

2. EUD / EUX (Erhvervsuddannelser - Vocational Education and Training)

You learn a trade and often start working while studying. You can become anything from a carpenter, chef, or hairdresser to a health care worker or IT supporter.

- **EUD** is purely vocational.
- **EUX** combines vocational training with academic subjects, so you can also go to university later.

👉 **Best for you if:** You like hands-on work, want to learn a skill/trade, but also want to keep the door open for further education.

3. 10. Klasse (Optional Year)

Some students choose to take an extra year (10th grade) to mature, get better grades, or decide what they want. You can do 10th grade at your local school or go to an **efterskole** (boarding school) — a popular option in Denmark.

🔥 **Best for you if:** You feel unsure about what to choose next or want to improve your grades or try a new environment.

🕒 How to Choose: Questions to Ask Yourself

- **Do I enjoy school and academic subjects?**
If yes → STX, HHX, HTX, or HF might be good fits.
- **Am I more practical or hands-on?**
If yes → EUD or EUX could be a better match.
- **Do I know what I want to become?**
If yes → Choose a path that leads you there. If not → Gymnasium or EUX gives you flexibility.
- **Would I benefit from a year to mature or explore?**
If yes → Consider 10th grade or efterskole.

🌍 Extra Advice Based on Your Background

Since your parents are from Benin and you were born in Denmark, you bring a multicultural background that can be a big strength — especially in fields like:

- **International business or trade** (via HHX)
- **Health and social care** (via EUD/EUX or HF)
- **IT or engineering** (via HTX or EUX tech programs)
- **Education or social work** (via STX or HF → university)

Also, being bilingual or multilingual can give you an edge — consider language-heavy programs or careers where cultural understanding matters.

✅ Summary

Path	Best For	Duration	Leads To
STX	General academics	3 years	University
HHX	Business/economics	3 years	Business careers/university
HTX	Tech and science	3 years	STEM careers/university
HF	Shorter academic route	2 years	University (some programs)
EUD	Practical work/trade	2–5 years	Direct job or career
EUX	Trade + academics	4–5 years	University or job
10th Grade / Efterskole	Maturity, self-discovery	1 year	Prep for next step
