

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you've just finished primary school (which in Denmark means **folkeskole** up to 9th or 10th grade), you're at an important decision point. Let's break down your options, and I'll suggest some paths depending on your interests and goals.

Educational options after folkeskole in Denmark

Here's what most students in your situation consider:

Gymnasiale uddannelser (Upper Secondary Education)

If you want to keep doors open for university or higher education, this is usually the path:

- **STX (Alment Gymnasium)** → Broad general education (good for university)
- **HHX (Handelsgymnasium)** → Focus on business, economics, marketing
- **HTX (Teknisk Gymnasium)** → Focus on technology, natural science, IT
- **HF** → Shorter, more practical version (2 years, often for students who want faster access to certain higher education)

 *Best if you enjoy academic subjects, want to study at university, or are unsure exactly what you want yet.*

Erhvervsuddannelser (Vocational Education and Training - VET)

You can choose to start training for a trade or profession (e.g. electrician, carpenter, hairdresser, chef, social and health care). These combine school with practical work placements.

 *Best if you prefer learning by doing, want to start working sooner, or have a clear idea of a skilled trade you like.*

Kombinationsmuligheder

Some schools offer **EUX**, which combines vocational training with gymnasial education → so you can both get a trade and qualify for university.

What to consider when choosing

- ✓ What subjects interest you most?
 - ✓ Do you prefer practical, hands-on learning, or theoretical learning?
 - ✓ Do you think you want to go to university later?
 - ✓ Would you enjoy working sooner, or do you want to focus on studying longer?
-

🌟 Possible suggestions for you

Since you're fluent in Danish and you have multicultural roots (which can be a big strength!), you might think about:

- **STX** if you're academically curious, enjoy humanities, languages, or sciences
 - **HHX** if you like business, languages (Danish + Spanish could be a big advantage!), and economics
 - **HTX** if you like technology, IT, or science
 - **EUX** if you want both a trade and the option for university
 - **A vocational program** if you already have a dream job (like chef, electrician, or designer)
-

⚡ My tip

- ➔ **Visit open house events (åbent hus)** at different schools.
 - ➔ **Talk to guidance counselors (studievejleder)** — they can help match your interests with programs.
 - ➔ **Consider your long-term dreams** — do you see yourself at university, or working in a specific trade?
-

If you want, tell me:

- 👉 What subjects do you like most?
- 👉 Do you have any career ideas or dreams already?
- 👉 Do you want to study at university later?

That way, I can help you choose even better! 😊
