

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your future! Let's break it down thoughtfully so you can explore good options. Since you just finished primary school in Denmark (which typically means *folkeskole* up to 9th or 10th grade), your next step would usually be some kind of *ungdomsuddannelse* (youth education). Here are some paths you could consider:

General Upper Secondary Education (Gymnasial uddannelse)

If you're interested in further academic studies (e.g. university later on), you might choose one of these:

- **STX (Almen studentereksamen)** – broad academic education with focus areas in sciences, humanities, or social sciences.
- **HHX (Højere handelseksamen)** – focus on business, economics, and international studies.
- **HTX (Højere teknisk eksamen)** – focus on technology, natural sciences, IT, and innovation.
- **HF (Højere forberedelseseksamen)** – shorter (2-year) program, often chosen by students who want a more practice-oriented and flexible academic path.

✓ *Recommended if:*

You like academic subjects, want to keep university options open, and enjoy classroom learning.

Vocational Education and Training (EUD / EUX)

If you're more interested in practical skills and want to enter the job market faster, or combine work and study:

- **EUD** – vocational training leading to specific jobs (e.g. electrician, carpenter, chef, hairdresser, healthcare assistant).
- **EUX** – combines vocational training with upper secondary academic level so you can both work in a trade and qualify for higher education.

✓ *Recommended if:*

You enjoy hands-on work, want to learn a trade, or like the idea of earning while learning through apprenticeships.

Other things to consider

Since you have a Bolivian background, you could:

- Choose programs that offer international perspectives (e.g. HHX or international STX programs)
 - Study Spanish as a strength — possibly useful in business, tourism, translation, diplomacy, or cultural exchange
-

How to decide?

Here are some next steps:

- Visit **uddannelsesguiden.dk (UG.dk)** — it has tools where you can see your options and take quizzes about what fits your interests.
 - Attend *åbent hus* (open house) events at nearby gymnasier or vocational schools.
 - Talk to an *UU-vejleder* (youth guidance counselor) — they can help you map out what fits your strengths and dreams.
 - Think about what subjects you enjoy most and how you like to learn — do you prefer books, projects, teamwork, or practical work?
-

 **If you tell me more about your interests (e.g. favorite subjects, hobbies, dream job ideas)** I can suggest more tailored paths! Would you like that?
