

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bosnia and Herzegovina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give a thoughtful answer! Since you're 16, fluent in Danish, and just finished primary school (*folkeskole* or similar), you're now at a point where Denmark's education system offers you several good options depending on your interests, strengths, and future goals.

Let's break it down:

🎓 Your main options after primary school

In Denmark, the typical paths are:

✅ Gymnasiale uddannelser (General upper secondary education)

If you want to keep your options open for university or higher education later, these are the routes:

- **STX (Almen gymnasium)** – broad, academic, with a mix of sciences, languages, and humanities.
- **HHX (Handelsgymnasium)** – focused on business, economics, marketing.
- **HTX (Teknisk gymnasium)** – focused on technology, natural sciences, IT, and design.
- **HF (Højere forberedelseseksamen)** – 2-year program for those wanting a shorter path to higher education (often chosen by older students or those wanting to change direction).

✅ Erhvervsuddannelse (VET / vocational education and training)

If you prefer hands-on learning and want to train for a specific job (e.g. carpenter, electrician, chef, hairdresser, IT support), this combines school + apprenticeship (praktik).

✅ Kombineret forløb (EUX)

If you want both a vocational education AND the option for higher studies, EUX lets you do both at once (more demanding, but keeps doors open).

🌟 What to consider when choosing

Ask yourself:

- Do I enjoy academic subjects like math, languages, history, science?
- Do I like practical, hands-on work?
- Do I want to go to university eventually, or would I rather start working earlier?
- Am I interested in business, technology, science, arts, or something else?

💡 Example paths based on interest

- **You like academic studies + want flexibility:** STX, HTX, HHX
- **You're interested in tech, design, or science:** HTX
- **You're into business or entrepreneurship:** HHX
- **You enjoy working with your hands / practical learning:** Erhvervsuddannelse or EUX
- **You're unsure and want to keep doors open:** STX or HTX are often good, broad options

🌐 Other strengths you might have

Since you have Bosnian heritage and speak fluent Danish (maybe also Bosnian or another language?), you could consider:

- Language-heavy programs (STX with language focus)
- International business (HHX)
- Roles where cultural understanding is valuable (e.g. in social work, international trade, tourism)

❤️ Final advice

👉 **Visit open houses (åbent hus)** at local gymnasier and vocational schools — talk to teachers and students.

👉 **Think about what excites you most in school now.**

👉 **Talk to a UU-vejleder (youth guidance counselor)** — they can give personalized help.

If you tell me about your favorite subjects, hobbies, or what kind of job you dream about, I can give you a more tailored recommendation!

Would you like help making a list of pros/cons for different paths, or help looking up schools near where you live? 😊
