

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Botswana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark and are considering your next steps, let's break it down clearly. In Denmark, after **Folkeskole (primary and lower secondary school)**, most students choose between several upper secondary education paths based on their interests and goals.

Main Options After Primary School in Denmark:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are good if you're considering going to university later.

- **STX (Alment Gymnasium):** Broad, academic focus (science, humanities, social sciences). Great if you're still figuring out what you like.
- **HHX (Higher Commercial Examination Programme):** Focus on business, economics, and languages. Good if you're interested in commerce or management.
- **HTX (Higher Technical Examination Programme):** Focus on science, tech, and engineering.
- **HF (Higher Preparatory Examination):** Shorter (2 years), a bit more flexible. Good if you want to go to university but prefer a shorter route.

Best if you:

- Want to go to university.
- Enjoy academic learning.
- Are curious about subjects like science, languages, business, or social studies.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These prepare you directly for a job (or can lead to higher education later).

- Includes fields like healthcare, IT, construction, mechanics, design, and more.
- Often involves **apprenticeships** (praktik) with real companies.

Best if you:

- Prefer hands-on learning.
- Want to start working and earning earlier.
- Like practical skills.

3. Kombinationsuddannelser (EUX)

A combination of vocational training and gymnasium-level academics. You can both get a profession and the right to study at university.

Best if you:

- Want both practical and academic options open.
 - Aren't sure whether you want to work or study more later.
-

Questions to Ask Yourself:

- Do I enjoy academic subjects (math, history, science)?
 - Do I prefer hands-on/practical learning?
 - Do I want to go to university someday?
 - What are my interests? (Technology, art, business, healthcare, etc.)
-

A Path You Might Consider:

Since you speak Danish fluently and have completed primary school here, **all options are open** to you. If you're not sure yet, **STX** is a good general path that gives you time to explore your interests and doesn't lock you in too early.

But if you're already interested in **tech, design, business, or hands-on work**, then **HTX**, **HHX**, or **EUX** could be perfect.

Would you like help deciding based on specific interests or dreams you have (e.g., becoming a doctor, engineer, starting a business)? That could help narrow things down.
