

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brazil. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background — it's great that you're thinking carefully about your next step! Since you're 16, you've completed *folkeskole* (Danish primary/lower secondary school), and now you're choosing between the typical upper secondary options in Denmark.

Let's break it down so you can choose what fits your interests, strengths, and future ambitions:

🎓 Main educational paths after primary school in Denmark

1 General upper secondary education

- **STX (Almen studentereksamen):** Broad academic program (humanities, social sciences, natural sciences). Good if you want to keep many doors open (e.g. university studies).
- **HHX (Higher Commercial Examination):** Focus on business, economics, international trade — good if you're interested in commerce or entrepreneurship.
- **HTX (Higher Technical Examination):** Emphasis on technology, science, IT. Great if you're interested in engineering, design, or science.
- **IB (International Baccalaureate):** Taught in English, international focus. Can be useful if you see yourself studying/working abroad later.

2 Vocational education (EUD/EUX)

- Combines school and apprenticeship in a company. You learn a trade (e.g. carpenter, chef, electrician, graphic designer).
- **EUX** lets you get both a vocational qualification *and* an upper secondary exam, so you can go to university later if you want.

💡 Questions to help you choose

- Do you enjoy academic subjects (e.g. languages, math, science), or do you prefer practical, hands-on learning?
- Are you thinking of going to university later, or would you rather work earlier?
- Do you want an international angle (maybe linking your Brazilian background or future study/work abroad)?

- Do you have any specific interests or passions — business, science, technology, arts, languages, crafts?

My suggestion (based on what you shared so far)

✅ Since you're fluent in Danish and have an international background (Brazilian parents), you could:

- Consider **STX** if you want to keep options open and aren't sure what to specialize in yet.
- Look at **IB** if you like the idea of studying in English, connecting with international students, and possibly studying abroad later.
- Explore **HHX** if you're drawn to business, economics, or global trade (your Brazilian roots could be a great strength here).

If you're more into doing things with your hands or want to start working earlier:

- **EUD/EUX** could be a great fit — and EUX gives flexibility if you change your mind about university.

Tip

Visit the *uddannelsesmesse* (education fairs), open houses at the schools near you, and talk to guidance counselors (*studievejleder*). They can help you see what fits your personality and ambitions.

If you tell me more about what you like (favorite subjects, hobbies, future dreams), I can help you narrow it down further! Would you like help with that? 🚀
