

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bulgaria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step! In Denmark, after finishing primary school (folkeskole), you have several educational options, and the best path depends on your interests, strengths, and future goals. Let me break it down for you:

Main educational paths after folkeskole

Since you're fluent in Danish and grew up here, all these options are open to you:

Gymnasiale uddannelser (General upper secondary education)

This path prepares you for higher education (university, professional bachelor, academy professions). The main options are:

- **STX (studentereksamen)** – broad academic program with humanities, natural sciences, and social sciences.
- **HHX (higher commercial exam)** – focus on business, economics, marketing.
- **HTX (higher technical exam)** – focus on technology, science, IT.
- **HF (higher preparatory exam)** – shorter (2 years), more practical/academic mix, often for those who want a faster way to higher education.

Good for you if:

- You like studying subjects like languages, history, science, economics, IT.
- You think you might want to go to university later.
- You enjoy classroom learning, theory, and projects.

Erhvervsuddannelser (Vocational education and training – EUD)

This is a combination of school and apprenticeship in a company (praktikplads). There are many fields like:

- Crafts (carpenter, electrician, mechanic)
- Health and care (social- og sundhedsassistent)
- Gastronomy (chef, baker)
- Business and retail
- IT, media and technology

👉 Good for you if:

- You prefer practical learning and working with your hands or solving real-world tasks.
- You want to start a career faster, or you want the option to continue to higher vocational education (EUX).

3 **EUX (Vocational + general upper secondary)**

This combines vocational education with a studentereksamen-level exam. You get both practical skills and a qualification for university.

👉 Good for you if:

- You want both a trade and the option to study further.
- You're ambitious and ready for a demanding but rewarding program.

☀️ How to choose?

Ask yourself:

- ✓ What subjects do I enjoy most in school?
- ✓ Do I prefer theory or practical tasks?
- ✓ Do I have a dream job or field in mind?
- ✓ Do I want to go to university or start working sooner?

💡 My recommendation

Since you're still exploring:

- ➔ **If you enjoy academics and want to keep your options open:** STX, HTX, or HHX.
- ➔ **If you like practical learning but want university as an option:** EUX.
- ➔ **If you prefer to learn a trade and start working earlier:** EUD.

📝 Next step

- Visit an **uddannelsesmesse** (education fair).
- Try **brobygning** or **praktik** (trial days at schools).
- Talk to a guidance counselor (UU-vejleder).

If you tell me about your interests, hobbies, or what subjects you like most, I can give you a more tailored suggestion! Would you like that? 🚀
