

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burkina Faso. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question! I'm glad you're thinking carefully about your next step. Since you just finished primary school in Denmark (which usually ends at grade 9 or 10), you're at the stage where you can choose among different upper secondary education options depending on your interests, strengths, and future plans.

Let's break it down to help you think it through:

Main education paths after primary school in Denmark

Gymnasiale uddannelser (Upper secondary school – academic focus)

These programs prepare you for university or other higher education.

- **STX** (Almen studentereksamen) – General upper secondary, broad academic subjects (humanities, sciences, social sciences).
- **HHX** (Højere handelseksamen) – Focus on business, economics, and international trade.
- **HTX** (Højere teknisk eksamen) – Focus on technical subjects like technology, science, IT.
- **HF** (Højere forberedelseseksamen) – Shorter program (2 years), more practical/thematic, often for older students or those wanting a faster route to higher education.

Erhvervsuddannelser (Vocational education and training – EUD)

- Combines school + apprenticeship (praktik) in a company.
- Good if you want to learn a trade (e.g., electrician, carpenter, chef, healthcare worker).
- Leads directly to a job or can be combined with higher education later.

Other options

- **Kombinerede forløb (EUX)** – Combines vocational training with academic subjects so you can both get a trade and qualify for higher education.
- **10th grade** – Some choose to take an extra year to become clearer about their interests, strengthen skills, or mature a bit before choosing.

How to decide?

Ask yourself these questions:

- Do I enjoy academic subjects and want to go to university later? → STX, HTX, HHX, HF
- Do I prefer learning by doing, working with my hands, and getting a job sooner? → EUD, EUX
- Do I have a clear interest already? (e.g., business → HHX; science/tech → HTX; practical skills → EUD)

✓ Consider your strengths

- Are you stronger in practical tasks, theory, or both?
- What subjects do you like best?

✓ Think about your future goals

- Do you want to work right after school or study more?
- Are you interested in international work (maybe building on your Danish-Burkinabe background)?

Tip: Your multicultural background is a strength!

- If you're interested in global issues, languages, or business, programs like HHX could suit you.
- If you want to contribute to society or do work with communities (e.g., social work, healthcare), vocational or academic paths could both work.

My general recommendation:

- If you're not sure yet and enjoy school: **STX** gives the broadest foundation.
- If you like business and international topics: **HHX**.
- If you like tech, science, or IT: **HTX**.
- If you want a job sooner or love hands-on learning: **EUD or EUX**.

Next step:

- Talk to a guidance counselor (UU-vejleder) at your school.
- Visit open house events (orieringsaften) at local schools.
- Maybe try a short internship or a "brobygning" (intro course) to experience different options.

If you tell me more about what you enjoy (subjects, hobbies, dream jobs), I can give a more personalized suggestion! 🚀
