

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cabo Verde. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it's great that you're thinking seriously about your next steps already. Since you're 16, have completed primary school in Denmark, and are fluent in Danish, you have several good options ahead of you depending on your interests, strengths, and long-term goals.

Here's a breakdown of your main educational paths after primary school in Denmark:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

If you're academically inclined and considering university later, this is likely the best path.

There are a few types, depending on your interests:

- **STX (Studentereksamen):** Broad academic education (humanities, science, languages).
- **HHX (Handelsskolens studentereksamen):** Focus on business, economics, marketing.
- **HTX (Teknisk studentereksamen):** Focus on science, technology, and engineering.
- **HF (Højere Forberedelseksamen):** Shorter (2-year) general academic program — good if you want to go to university but prefer a shorter route.

✅ *Recommended if:* You enjoy academic subjects, want to keep your options open, and may be interested in university.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is a more hands-on, practical education that combines school and paid apprenticeships (læreplads).

Examples of professions you can train for:

- Electrician
- Carpenter
- Hairdresser
- IT Support
- Chef
- Social and Health Assistant

✅ *Recommended if:* You like learning by doing, want a clear path to a job, or aren't as interested in purely academic study.

3. Kombinerede forløb / EUX

This combines vocational training *and* an upper secondary academic degree, giving you both job skills and access to university.

✓ *Recommended if:* You're interested in both practical skills and the possibility of higher education later.

How to Choose?

Ask yourself:

- Do I like school and learning from books, or do I prefer hands-on tasks?
 - Do I want to work as soon as possible or study longer?
 - What am I passionate about — people, technology, business, nature, art?
-

Bonus: Your Cultural Background

Being from a Cabo Verdean background and fluent in Danish means you're multicultural — that's a strength. It could open doors in:

- International business or diplomacy (via STX or HHX)
 - Healthcare or social work in diverse communities
 - Language and cultural studies
-

Tip:

Talk to a **UU-vejleder (Ungdommens Uddannelsesvejledning)** — they can give you personal advice, arrange visits, and help you apply to your chosen program.

If you'd like, I can help you narrow down your choice based on what subjects you enjoy or what career fields you're curious about. Would you like to go through some options together?
