

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cabo Verde. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself! It's great that you're thinking carefully about your next steps. Since you're 16 and have completed primary school in Denmark, you're at an exciting point where you can shape your future based on your interests, strengths, and goals. Let me break it down to help you consider your options.

📌 Your main educational paths in Denmark after primary school (folkeskole)

In Denmark, after folkeskole, you usually choose between:

1 Gymnasiale uddannelser (General upper secondary education)

These prepare you for higher education (university, professional bachelor, etc.). Examples:

- **STX (Almen studentereksamen)** – Focus on a broad academic program with humanities, sciences, and social sciences.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international topics.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, and technical subjects.
- **HF (Højere forberedelseksamen)** – A shorter, 2-year academic program for those wanting a more practical, adult-oriented environment.

2 Erhvervsuddannelser (Vocational education and training, EUD)

These combine school with apprenticeship (praktik) and prepare you for a trade, craft, or technical job (e.g., carpenter, chef, electrician, hairdresser).

3 Kombinerede forløb / andre muligheder

- **EUX** – Combines vocational training with a studentereksamen, so you can both work and study later.
- **10. klasse** – If you want an extra year to mature, explore interests, or improve your academic skills.

⚡ How to choose? Consider these questions

✓ **What subjects do I enjoy?** Do you love science, languages, technology, business, or creative subjects?

✓ **Do I prefer practical learning or theory?** Gymnasium = more classroom/theoretical. EUD/EUX = practical + hands-on.

✓ **What's my long-term vision?** Do I want to go to university, start working sooner, or keep my options

open?

✓ **How do I like to learn?** Big groups, independent study, practical work, teamwork?

My recommendation (based on your info so far)

Since you're fluent in Danish, born and raised in Denmark, and open-minded about your next step:

- If you **enjoy school subjects and want the possibility of university** → Consider **STX** (if you like variety), **HHX** (if you're interested in business/economics), or **HTX** (if you like science/technology).
 - If you **prefer hands-on work but still want the option for higher education** → **EUX** could be a great fit.
 - If you want **to start working earlier, learn a trade, and get paid during apprenticeship** → **EUD** could be the right track.
-

Final tips:

 **Talk to your school's guidance counselor (UU-vejleder)** – they can help match your interests to programs.

 **Visit open house events (åbent hus)** at local schools to see what feels right.

 **Think about what excites you** — no choice locks you in forever; in Denmark, the system allows flexibility and later changes.

 If you tell me about your favorite subjects, hobbies, or dreams (e.g., "I want to work with people," "I like technology," "I want to travel"), I can help you narrow it down even more! Would you like to share that?
