

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cambodia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've finished primary school – congratulations! You're at an exciting point in your life, and living in Denmark gives you access to a strong education system with many different paths, depending on your interests, strengths, and future goals.

Here's an overview of your main options after primary school (9th or 10th grade) in Denmark, along with some guidance based on different scenarios:

Main Educational Paths in Denmark After Primary School

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are aimed at preparing you for university.

- **STX (Studentereksamen)** – More academic and broad. Includes science, humanities, and social sciences.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination)** – Focus on science, technology, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), good for more practical learners or late bloomers.

Recommended if:

You enjoy academic learning and want to keep your options open for university or other higher education.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are for students who want to enter the workforce more directly or become skilled workers.

- Includes trades like electrician, carpenter, chef, IT supporter, hairdresser, and more.
- Combines school and apprenticeship (praktik).

Recommended if:

You prefer hands-on learning and want to start working and earning earlier.

3. EUX – A Combination Path

A mix of vocational training and general upper secondary education. You get both a vocational qualification **and** the option to go to university afterward.

Recommended if:

You like practical learning but also want to keep the door open for higher education.

Choosing the Right Path – Questions to Consider

1. Do you enjoy school and studying?

- Yes → Consider **STX**, **HHX**, **HTX**, or **HF**
- No or prefer hands-on → Consider **EUD** or **EUX**

2. Do you already have an idea of what job you want?

- Yes → Look into **EUD** or **EUX** in that field
- No → **STX** or **HF** can keep many doors open

3. Do you like business, tech, science, or creative subjects?

- Business → **HHX**
- Tech/Science → **HTX**
- General/academic subjects → **STX**
- More flexible → **HF**

Example Paths Based on Interest

Interest	Recommended Path
Medicine, law, psychology	STX
Business, marketing, economics	HHX
Engineering, tech, science	HTX
Creative arts or social work	HF or STX
Becoming a chef, electrician, IT-supporter	EUD or AUX

A Note on Your Cambodian Heritage

Your cultural background can be a strength. You may want to consider:

- Language skills: Learning Khmer or another language could open doors in international work.
- Global mindset: Your background might give you unique perspectives valuable in business, diplomacy, or multicultural environments.

Final Advice

You're young, so don't worry about having everything figured out. The Danish system gives you flexibility. Pick a path that:

- Matches your interests and strengths
- Keeps your motivation up
- Keeps doors open if you're unsure
