

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cambodia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that! It sounds like you're at an exciting stage where you can shape your future. Since you've just finished primary school (in Denmark, that means **folkeskole**, usually up to 9th or 10th grade), you have several good options depending on your interests, strengths, and goals.

Let's break it down clearly:

Your main educational options after primary school in Denmark

1 Gymnasiale uddannelser (Upper secondary education – more academic)

- **STX (Alment gymnasium)** – Focuses on broad academic subjects: languages, humanities, sciences. Good if you want to keep many doors open for university.
- **HHX (Handelsgymnasium)** – Business, economics, and international trade focused. Good if you like business, marketing, or finance.
- **HTX (Teknisk gymnasium)** – Focuses on technology, science, and engineering topics. Good if you like tech, IT, science.
- **HF (Højere forberedelseksamen)** – A shorter (2-year) general academic program, often more practical, good if you want a faster route to higher education.

✓ These lead to university or university college (professionsbachelor).

2 Erhvervsuddannelser (Vocational education / apprenticeship programs)

- Learn a trade while working (electrician, carpenter, hairdresser, chef, etc.).
- Combines school + paid apprenticeship at a company.
- Leads directly to work, but you can also continue to further education (e.g. erhvervsakademi, professionsbachelor).

✓ Good if you like hands-on work and want to enter the workforce sooner.

How to choose?

Ask yourself:

- Do I enjoy school subjects like math, languages, science, history? → Maybe **STX**, **HTX**, **HHX** or **HF**.
 - Do I prefer practical, hands-on work? → Maybe **erhvervsuddannelse**.
 - Do I have an idea of my future job? (e.g. doctor, engineer, designer, entrepreneur) → Choose a path that leads towards that.
 - Do I want to keep many options open? → **STX** or **HTX** are good general options.
-

Additional advice

- Visit **uddannelsesmesser** (education fairs) and **åbent hus** (open house days) at schools near you — see what feels right!
 - Talk to a **vejleder** (guidance counselor) — they can help you match your strengths and interests.
 - Don't stress — in Denmark, the system is flexible. If your first choice doesn't fit, you can change direction later.
