

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cameroon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — and congratulations on finishing primary school! At 16 in Denmark, you're at an important crossroads in your education. Since you're already fluent in Danish and have a multicultural background, you have some strong advantages. Here's a breakdown of your options and some guidance based on your situation and goals.

Your Main Options After Primary School in Denmark

After 9th or 10th grade, most Danish students choose one of these main paths:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university later on.

- **STX (Alment Gymnasium):** Focuses on a broad academic curriculum (humanities, sciences, languages).
- **HHX (Handelsskolen):** Focuses on business, economics, and international topics.
- **HTX (Teknisk Gymnasium):** Focuses on technology and science.
- **HF (Højere Forberedelseksamen):** A 2-year option for more mature students or if you want a shorter path.

✓ *Best if:* You enjoy academic subjects and want to go to university later.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are more practical and work-focused. You combine school with internships and apprenticeships.

- Examples: Electrician, carpenter, chef, healthcare worker, mechanic, IT support, etc.
- Some programs also include options to take *EUX* (a mix of vocational and academic education), which allows you to qualify for university later too.

✓ *Best if:* You enjoy hands-on work or want to start working earlier — but with the *EUX* you still keep the door open to university.

Extra Considerations for You

Since you have Cameroonian roots and are fluent in Danish, you might also consider paths where multicultural knowledge, language, or international understanding is a strength.

Some ideas:

- **HHX** could be a strong choice if you're interested in business, languages, or international trade.
- **STX** is good if you love learning and want to keep your options very open.
- **EUX** is a strong choice if you like doing things with your hands *and* want to keep studying later.

How to Decide

Here are a few questions to help guide your choice:

1. **Do you prefer theory (books, writing, exams) or practical work (building, creating, doing)?**
2. **Do you already have an interest in a specific job or career?**
3. **Do you want to go to university, or would you prefer to get a job earlier?**
4. **Do you like working with people, technology, business, or something else?**

Recommendation Based on What You've Shared:

Since you're fluent in Danish, have completed school in Denmark, and have an international family background, I would recommend:

Try STX or HHX if you're interested in a wide range of academic subjects, languages, business, or want to go to university in the future.

Try EUX if you're practical and want a job-focused education but still want the chance to go to university later.

If you're still unsure, it might be helpful to **talk to a guidance counselor (studievejleder)** at your school or a local *ungdomsuddannelsesvejleder* — they can help match your interests with the right path.

Would you like help figuring out what careers match your interests? I can ask you a few questions and give some ideas!
