

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cameroon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a really thoughtful question, and it's great that you're already thinking carefully about your next steps! Let's break this down so you can make a choice that fits your interests, strengths, and future goals.

Understanding your options after primary school in Denmark

In Denmark, after primary/lower secondary school (folkeskole), most young people choose one of these paths:

1 Gymnasiale uddannelser (Upper Secondary Education)

These programs prepare you for higher education:

- **STX (Alment Gymnasium)** – Broad academic focus (languages, sciences, humanities)
- **HHX (Handelsskole)** – Focus on business, economics, marketing
- **HTX (Teknisk Gymnasium)** – Focus on technology, natural sciences, technical subjects
- **HF (Højere Forberedelseseksamen)** – 2-year program, often chosen by people who want a shorter, more practical academic route

2 Erhvervsuddannelser (Vocational Education and Training, VET)

Combines school with practical work experience (apprenticeships). Leads to skilled trades or technical professions (e.g. electrician, carpenter, chef, hairdresser, IT-supporter).

3 Kombinerede forløb

- **EUX** – A combination of VET and gymnasiale subjects. Gives you both a vocational qualification and eligibility for higher education.

How to choose?

Here are some key questions to ask yourself:

 Do you enjoy academic subjects and see yourself going to university later? → Consider STX, HHX, HTX, or HF.

 Are you eager to work with your hands, learn a trade, or start earning sooner? → Consider a vocational education or EUX.

 Are you passionate about business, science, technology, or creative fields? → Your interest can guide whether STX, HHX, or HTX suits you best.

🌟 Recommendations based on what you've shared

Since you:

- are fluent in Danish
- have completed primary school in Denmark
- may have multicultural strengths (e.g., being able to connect across cultures)

👉 If you enjoy academic subjects and want to keep your options open:

→ **STX** is a flexible choice with many subject combinations.

👉 If you're interested in business or entrepreneurship:

→ **HHX** could be a great fit, especially if you see yourself working internationally or starting a business (perhaps something linking Denmark and Cameroon!).

👉 If you're drawn to technology, science, or engineering:

→ **HTX** can give you a head start.

👉 If you prefer a practical, hands-on path but still want the option for higher education:

→ **EUX** offers both a trade and study options later.

💬 Next step

If you'd like, tell me:

- What subjects do you enjoy most? (e.g., math, languages, science, art)
- Do you have any career dreams or ideas right now? (It's okay if you don't!)
- Do you prefer working with people, with technology, with ideas, or with your hands?

I can help you narrow it down further based on your interests!

And remember: in Denmark, it's quite normal to switch paths later if you discover something new about yourself. 😊
