

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cameroon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you're 16, have finished primary school (I assume you mean **folkeskole** or the equivalent), and are fluent in Danish, you have several good options in Denmark's education system. Let me break it down for you and give some recommendations based on different goals and interests.

Main educational paths after primary school in Denmark

Here are the most common options for young people your age:

1 Gymnasiale uddannelser (Upper secondary school – general education)

These prepare you for university:

- **STX (studentereksamen)** – broad academic program (good if you like subjects like Danish, English, history, math, science)
- **HHX (higher commercial exam)** – focus on business, economics, and languages
- **HTX (higher technical exam)** – focus on science, technology, and IT
- **HF (higher preparatory exam)** – shorter, 2-year program, often for those who want to go to university but in a more practical or mature setting

 **Recommended if:** you want to keep doors open for university or higher education, or if you like academic subjects.

2 Erhvervsuddannelser (Vocational education and training – EUD)

You combine school with apprenticeship (praktik) in a company.

Examples:

- carpenter, electrician, chef, hairdresser, healthcare assistant, mechanic
- EUX combines vocational training with a more academic program, so you can both work and have university options.

 **Recommended if:** you like hands-on work, want to learn a trade, or prefer earning while learning.

3 Other possibilities

- **International programs** (e.g., IB – International Baccalaureate) if you like English or want international opportunities
 - **10th grade (10. klasse)** if you want to strengthen your skills or take more time to choose
-

☀️ How to choose?

Here are some reflection questions:

- Do you prefer practical, hands-on work or academic study?
 - Are you aiming for university or would you rather get into work sooner?
 - Which subjects do you enjoy most (languages, science, business, technology, art)?
 - Would you like to study in a more international environment?
-

💡 Personalized suggestion

Since you're fluent in Danish and grew up in Denmark, you can choose any path. Given your background, you might also consider:

- **STX or HHX** if you want to keep options open, maybe with an interest in social studies, business, or international affairs.
 - **EUX** if you like the idea of both a trade and the possibility of university.
 - **HTX** if you enjoy technology, science, or innovation.
-

✅ Next steps

- Visit open house events (Åbent Hus) at local gymnasiums or vocational schools
- Talk to a guidance counselor (UU-vejleder) — they can help you find the right match
- Maybe do a short internship or job-shadowing if you're unsure

If you tell me a bit more about what you enjoy (favorite subjects, hobbies, dream job), I can help you narrow it down! 🚀
