

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Canada. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that's really helpful. You're at a great point to make some meaningful choices, and Denmark gives you quite a few options. Since you've just finished **folkeskole** (primary/lower secondary education), the typical paths forward are:

Main Educational Options After Folkeskole in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education)

If you're academically strong or interested in university later on, this is the standard route.

- **STX (Studentereksamen):** Focuses on a broad academic curriculum, including humanities, natural sciences, and social sciences.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination):** Focus on technology, natural sciences, and technical subjects.
- **HF (Higher Preparatory Exam):** Shorter (2 years), more flexible — good if you're not 100% sure or want to keep doors open.

Recommended if:

You're considering university later, or want broad academic training.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine classroom education with apprenticeships (praktik) in a workplace.

- Covers many fields: mechanics, hairdressing, carpentry, IT support, gastronomy, health care, etc.
- You'll typically finish with a **svendebrev** (journeyman certificate).

Recommended if:

You enjoy hands-on learning and want to work sooner — or are passionate about a specific trade.

3. EUX (Combination of Vocational and Academic Education)

Mixes vocational training with general upper secondary courses.

- Takes a bit longer but keeps university options open.

- You graduate with both a **svendebrev** and a **studentereksamen-level diploma**.

Recommended if:

You want the best of both worlds — hands-on skills *and* the ability to go to university later.

Based on What You Shared...

Since you're fluent in Danish and were born in Denmark, you can fully participate in the regular Danish system. But your Canadian background might also open up **international opportunities**.

Here are a few custom suggestions:

➤ If you like academics and want flexibility:

STX or **EUX** could be good bets. They keep your future wide open — both in Denmark and abroad (e.g., studying in Canada or another country).

➤ If you're unsure what you want yet:

Consider **HF**, especially if you want a shorter, lighter program with a general focus — or take a **10th grade year** at a **efterskole** to explore interests before committing.

➤ If you like working practically or want a career sooner:

An **EUD** path with a trade apprenticeship could be a smart move, especially if you're motivated to get into the workforce early.

Bonus: International Opportunities

With Canadian roots, you might also explore:

- **International Baccalaureate (IB)**: Taught in English, widely recognized worldwide — great for studying abroad later.
- Some **efterskoler** or **gymnasiums** offer international lines or bilingual options.

Final Tips

- Think about what subjects interest you (sciences, business, humanities, trades).
- Talk to a **UU-vejleder (youth guidance counselor)** — they can give personalized help.
- Visit open houses at gymnasiums or vocational schools.
- Consider trying a **praktik** (internship) or “brobygning” (intro courses) to test different paths.

If you'd like, I can help you build a **personalized decision guide** or pros and cons chart. Would you like that?
