

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Canada. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question—let's break it down together! Since you've just finished primary school in Denmark (which typically means you've completed **Folkeskole** or similar up to grade 9 or 10), you're now looking at **upper secondary education (ungdomsuddannelse)**. Your next step will depend on your interests, strengths, and future goals. Here's an overview of your main options:

Upper Secondary Education Options in Denmark

1 Gymnasiale uddannelser (General Upper Secondary)

These are for you if you want to keep your options open for university later.

- **STX (Alment gymnasium)** – Broad academic program (sciences, social sciences, humanities, languages).
- **HHX (Handelsgymnasium)** – Focus on business, economics, international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, engineering.
- **HF (Højere forberedelseseksamen)** – Shorter 2-year program, more practical, aimed at students who want a faster path to higher education.

✓ *Recommended if:* You like academic study, want to go to university, or are not yet sure what you want to specialize in.

2 Erhvervsuddannelser (Vocational Education and Training / VET)

These combine school and apprenticeship (praktik).

- Examples: electrician, carpenter, chef, graphic designer, hairdresser, etc.
- You start with basic courses, then spend much of your time working with a company.

✓ *Recommended if:* You prefer hands-on learning and want to go directly into a trade or profession.

3 Other options

- **International programs (e.g., International Baccalaureate / IB)** – Since you have Canadian roots, you might like the international environment. IB is offered in Denmark and is recognized worldwide.

- **Efterskole or højskole (optional)** – A one-year experience focusing on personal growth, special interests (music, sports, art), or preparation for upper secondary.

✓ *Recommended if:* You want a different kind of educational or personal development experience for a year.

☀️ How to choose?

Here are some questions you might ask yourself:

- Do I enjoy academic subjects, or do I prefer learning by doing?
- Am I interested in going to university in the future, in Denmark or abroad (e.g. Canada)?
- Do I want an international environment, or am I happy with a Danish setting?
- What subjects or activities excite me the most?

🌍 Special note on your Canadian connection

Since your parents are Canadian:

- You might consider pathways that keep options open for study in Canada later. An STX, HHX, HTX, HF, or IB diploma can help with that.
- An IB might make international university admission smoother.

💡 My general recommendation

Since you're fluent in Danish, born and raised in Denmark, but have an international connection:

- 👉 **STX or IB** would be my top suggestion if you like academic studies and want to keep doors open.
- 👉 **HHX or HTX** could be great if you have a clear interest in business or technology.
- 👉 **VET** if you know you want a trade or practical career and prefer work-based learning.

If you'd like, I can help you:

- ✓ Compare specific schools in your area.
- ✓ Explore programs that match your interests (e.g., science, languages, arts).
- ✓ Plan a path that could lead to university in Canada or Denmark.

Would you like to share what subjects or activities you enjoy most? That will help me give you a more tailored recommendation! 🚀
