

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chile. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give a more thoughtful answer! Since you're 16, just finished primary school in Denmark (I assume *folkeskole* or similar), and are fluent in Danish, you have several good options depending on your interests, strengths, and future goals. Let's break them down:

Main Educational Options in Denmark after Primary School

At your age and stage, these are typical paths:

1 Gymnasiale uddannelser (Upper Secondary Education)

These prepare you for higher education (university or university colleges).

- **STX (Alment gymnasium)** – general upper secondary school; broad academic subjects (humanities, sciences, social sciences).
- **HHX (Handelsgymnasium)** – focus on business, economics, marketing, international trade.
- **HTX (Teknisk gymnasium)** – focus on technology, natural sciences, IT, and innovation.
- **HF (Højere forberedelseseksamen)** – shorter, more practical, often chosen if you want a 2-year academic program before further study.

2 Erhvervsuddannelser (Vocational Education and Training - EUD)

If you're interested in learning a trade (e.g., carpenter, electrician, chef, social care), this combines school + apprenticeship in a company. You can still pursue higher education later (e.g. via *EUX*).

3 EUX (Combined vocational + general education)

Gives both a vocational qualification *and* access to higher education — a good mix if you want practical skills but also keep the door open for university.

How to Choose?

Ask yourself:

- ✓ Do I like academic subjects, and can I see myself in university later? → *Consider STX, HHX, HTX, or HF*
- ✓ Am I more hands-on, practical, and want to work sooner or learn a craft? → *Consider EUD or EUX*
- ✓ Do I have specific interests already (science, business, design, social care)? → *Match them to the programs*

Your Background: a strength!

💡 Being of Chilean heritage and fluent in Danish is a big plus. You could consider:

- HHX if you like languages, trade, and international topics.
 - STX if you enjoy humanities or social sciences — perhaps even with Spanish as a strong subject.
 - Later, you could look at international programs, global business, or diplomacy.
-

My recommendation

Since you just finished primary school and probably want to keep options open:

➡ **STX or EUX could be great choices** — STX if you like academic studies (broadest path to university), EUX if you want both practical skills and the chance for higher education.

But of course, the *best* choice depends on:

- What you enjoy learning (math, science, languages, art, business?)
 - How you like to learn (more theory or more practical?)
 - Your long-term dreams (university, a profession, own business, etc.)
-

💬 If you want, tell me:

- What subjects do you enjoy most in school?
- What are your hobbies or passions?
- Do you already have ideas about a future job or field?

I can then help narrow it down even more! 🌟
