

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from China. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing about your background — it's great that you're thinking carefully about your next step! Since you've just finished **primary school** (in Denmark, this usually means you've completed **9th or 10th grade in folkeskole**), your options depend on your interests, strengths, and future ambitions. Let's break it down:

Main educational options after folkeskole in Denmark

Here are the typical pathways:

1 Gymnasiale uddannelser (General upper secondary education) — If you want to keep your options open for university later:

- **STX (Alment gymnasium)** — Broad academic focus, with science, humanities, and social science tracks.
- **HHX (Handelsskole)** — Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** — Focus on technology, natural sciences, and innovation.
- **HF (Højere forberedelseseksamen)** — A 2-year program (often for those who want a more practical, shorter academic route).

2 Erhvervsuddannelser (Vocational education and training / EUD) — If you want to train for a trade or profession while gaining practical work experience (e.g., electrician, chef, healthcare assistant). You can still continue to higher education later through *eux*, which combines vocational training and academic qualifications.

3 EUX (a mix of vocational training + gymnasium level) — If you want a skilled trade qualification *and* the possibility to go to university.

What could suit you?

Since you're fluent in Danish, born and raised in Denmark, and have a multicultural background:

✓ A **gymnasial education (STX, HHX, HTX)** could be a good next step if:

- You like academic subjects and want to go to university later (in Denmark or abroad).
- You're not yet sure what job you want and want to keep your options open.

✓ A **vocational path (EUD or EUX)** could be a great fit if:

- You're interested in learning a trade, working hands-on, or earning while learning.
- You want to work sooner, but still want the option to study more later.

Special thoughts given your background

👉 Your knowledge of both Danish and Chinese culture could be a big advantage, especially in areas like:

- International business (HHX)
- Technology and innovation (HTX)
- Language and culture studies (STX, with language options)

If you speak Chinese at home, adding strong English and possibly other languages in gymnasium could prepare you for an international career.

💡 How to decide?

Here's what I suggest:

- **Visit open houses (infoaften)** at local gymnasiums and vocational schools.
- **Talk to your school counselor (UU-vejleder)** — they can help match your interests to programs.
- **Try a "brobygning" / introduction course** — these short intro programs help you experience the different education paths before deciding.

Final advice

- ➡ If you enjoy learning broadly and want flexibility: **STX, HHX or HTX**
- ➡ If you want to work hands-on or learn a trade: **EUD or EUX**
- ➡ If you're unsure: consider STX or EUX — both keep options open!

If you want, tell me a bit more:

- What subjects do you like most?
- Do you enjoy practical work or academic study more?
- Are you thinking about university later?

I can help you narrow it down! 😊
