

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Colombia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that really helps in giving thoughtful advice! Since you're 16, have completed primary school in Denmark (likely *folkeskole* or similar), and are considering your next steps, here's an overview of your options and some recommendations based on different interests and goals:

Main Educational Paths After Primary School in Denmark

At this stage, you generally choose between:

1 Gymnasiale uddannelser (Upper secondary education, academically oriented)

- *STX* (Almen studentereksamen): Broad, general academic programme. Good if you want flexibility for university later.
- *HHX* (Higher commercial examination): Focus on business, economics, and marketing.
- *HTX* (Higher technical examination): Focus on technology, science, and innovation.
- *HF* (Higher preparatory examination): A shorter, 2-year option (often for students who want a more practical route to higher education or a fresh start).

2 Erhvervsuddannelser (Vocational education and training / VET)

- Combines school and paid apprenticeships. Examples: electrician, carpenter, hairdresser, chef, social and health care assistant.
- Good if you want to work sooner and in a specific trade or profession.

3 Other options

- *International programs* (if you want more English instruction or to prepare for studies abroad)
- *Efterskole* (optional, 1-year boarding school with focus on personal development, special interests, or bridging to secondary education)

Things to consider

Interests & strengths:

- Do you enjoy academic subjects like languages, science, history, math? → *STX / HTX / HHX*
- Are you passionate about hands-on work, crafts, technology, or helping people? → *VET*

- Are you looking for a fresh environment, maybe with international exposure? → Consider international schools or HF

✓ Career dreams:

- University in the future? → *STX, HHX, HTX*
- Enter workforce sooner, skilled trade? → *VET*

✓ Learning style:

- Like classroom theory? → Gymnasiale
- Like practical, hands-on work? → *VET*

✓ Cultural background as a strength:

- Being bilingual and bicultural can open doors (e.g., international business, languages, diplomacy, social work, teaching).

☀ Example recommendations

- ☞ If you're unsure what you want to do long-term but want to keep your options open → **STX** is a safe, broad choice.
- ☞ If you like business, economics, or the idea of working internationally → **HHX** could suit you.
- ☞ If you enjoy science, technology, engineering, or innovation → **HTX** would match well.
- ☞ If you'd like a quicker, practical path to a specific career → **VET** could be great — and there's high demand in many trades.

💡 Final advice

- **Visit open house events** at local gymnasiums and vocational schools — it helps a lot to feel the atmosphere.
- **Talk to a guidance counselor (UU vejleder)** — they can tailor advice to your exact situation.
- **Think about trying an *efterskole* or exchange program** for a year if you want to explore before committing.

If you'd like, I can help you:

- ☞ Make a pros/cons list for different options
- ☞ Explore specific careers or fields
- ☞ Find schools near where you live

Would you like help with that? 😊
