

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Comoros. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps—this is an important stage in your life! Since you've just finished primary school (in Denmark, that would mean *folkeskole*), you have several good options depending on your interests, strengths, and goals. Let me break it down for you:

Your options after primary school

In Denmark, after *folkeskole*, most students choose between:

1 Gymnasiale uddannelser (upper secondary education – academic focus)

These programs prepare you for university:

- **STX (studentereksamen)** – General upper secondary school with a broad selection of subjects (humanities, natural sciences, social sciences).
- **HHX (higher commercial examination)** – Focus on business, economics, and languages.
- **HTX (higher technical examination)** – Focus on technology, natural sciences, and technical subjects.
- **HF (higher preparatory examination)** – A shorter (2-year) program, good for people who want flexibility or who took a break after primary school.

 Choose this path if you enjoy academic subjects, think you might want to go to university, or aren't sure yet.

2 Erhvervsuddannelser (vocational education and training – practical focus)

- These combine school with an apprenticeship (praktik) in a company.
- Leads directly to a profession (e.g. electrician, hairdresser, carpenter, chef, health worker, IT supporter).
- Takes 3-5 years depending on the program.

 Choose this path if you prefer hands-on learning and want to enter the workforce more directly.

Things to consider

What are your interests?

Do you like working with people? Are you good at math, languages, science, or arts?

Do you prefer theory or practice?

✓ **How do you like to learn?**

Do you enjoy sitting in class and studying for exams, or do you prefer learning by doing?

✓ **What are your long-term dreams?**

Do you think about going to university? Starting a business? Learning a craft or trade?

✓ **Your strengths**

If you're good at Danish (which you are), you can handle both gymnasiale and vocational education, but your interests and motivation matter most.

⚡ **Example paths:**

- If you like **science/technology**, consider **HTX**.
 - If you like **business/economy**, consider **HHX**.
 - If you like **languages/humanities**, consider **STX**.
 - If you want to **learn a trade or practical skill**, consider a vocational education.
-

💡 **My suggestion**

Since you're not mentioning a specific interest yet:

- 👉 I recommend visiting open house events (*åbent hus*) at local gymnasier and vocational schools.
 - 👉 You could also try a **brobygning** or **introforløb** (introductory course) — these are short trial programs that help you see what fits you best.
 - 👉 Talk to a guidance counselor (*UU-vejleder*) — they can help you make a plan tailored to you.
-

If you want, tell me:

- What are your favorite subjects?
- Do you prefer practical work or academic studies?
- Any ideas about your dream job?

Then I can give you more specific recommendations! 😊
