

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Costa Rica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and exciting point in your life — congratulations on finishing primary school! In Denmark, at 16, you have several good options depending on your interests, learning style, and future goals. Let's break it down a bit so you can reflect and choose what fits you best:

Educational Paths After Primary School in Denmark

Since you've completed *folkeskolen*, here are your main options:

Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university later. They typically last 3 years and focus on academic subjects.

- **STX (Studentereksamen)** – Broadest program with humanities, science, and social science.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and languages.
- **HTX (Higher Technical Examination)** – Focus on technology, science, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more flexible, often for those who want a quicker route to higher education.

 *Recommended if you enjoy school subjects, want to keep doors open for university, and are motivated by academic learning.*

Erhvervsuddannelser (Vocational Education and Training, EUD)

A combination of school and apprenticeship (praktik) in a company. You learn a trade or profession (e.g., electrician, chef, carpenter, IT support).

 *Recommended if you want hands-on learning, to earn a wage during training, and a direct path into the workforce — though you can still later study further (e.g., *erhvervsakademi* or *professional bachelor*).*

Kombinerede forløb (EUX)

A mix of vocational training and academic subjects. You get both a vocational qualification *and* a gymnasial level certificate. It's demanding but gives many options.

 *Recommended if you want practical experience and also want to keep doors open for higher education.*

☀️ Other factors to consider

- ✅ **Your interests:** Do you like theory (math, languages, history)? Or do you prefer hands-on work (mechanics, design, cooking)?
- ✅ **Your future goals:** Do you already dream of a profession (e.g., doctor, engineer, entrepreneur, IT specialist)?
- ✅ **Language strengths:** With Costa Rican heritage, perhaps you're strong in Spanish? That could open interesting options in HHX or STX with language focus.

💡 Personal suggestion

Since you're bilingual and have a multicultural background, and you've completed Danish primary school successfully:

- If you like school subjects: **STX or HHX** could be great, as they give you a wide range of options and build on your language and academic strengths.
- If you prefer action and learning by doing: **EUX** gives the best of both worlds — or **EUD** if you want to start a career sooner.

📝 Next steps

- Visit uddannelsesguiden.dk and try their "EUD/STX/HHX/HTX" quiz.
- Attend **open house events** (åbent hus) at local gymnasiums or erhvervsskoler.
- Talk to a **UU-vejleder** (educational counselor) — they can guide you in person.

If you tell me more about your **interests, favorite subjects, or career dreams**, I can give a more tailored recommendation! Would you like help making a comparison chart or list of nearby schools in your area? 😊
