

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Costa Rica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's wonderful that you're thinking carefully about your next step! Since you've just finished **primary school in Denmark** (which usually ends at grade 9 or 10), you have several good options depending on your interests, strengths, and future goals. Let me outline the main paths available to you, along with considerations for each:

General Upper Secondary Education (Gymnasiale uddannelser)

These are primarily academic and prepare you for higher education (universities, business schools, etc).

✓ STX (Almen Studentereksamen)

- Broad general education with focus on humanities, natural sciences, and social sciences.
- Good if you want flexibility for university studies.

✓ HHX (Højere Handelseksamen)

- Focus on business, economics, and international trade.
- A strong choice if you're interested in business, marketing, or finance.

✓ HTX (Højere Teknisk Eksamen)

- Focus on technical and natural science subjects, including IT, engineering, and technology.
- Ideal if you enjoy science, technology, or innovation.

✓ HF (Højere Forberedelseseksamen)

- A 2-year program, often for those who prefer a slightly shorter, more practical route to higher education.

Consider this if:

You like academic subjects, plan to go to university, or want to keep your options open.

Vocational Education and Training (Erhvervsuddannelser - EUD)

Combines school and apprenticeship in a company. Leads to skilled trades (crafts, technology, service, healthcare, etc).

- ✓ Examples: electrician, chef, carpenter, mechanic, childcare worker, healthcare assistant.
- ✓ Often quicker path to a job (about 3-4 years).
- ✓ You can also later take further education (e.g., erhvervsakademi).

 Consider this if:

You prefer practical work, want to earn while you learn, and are motivated by hands-on learning.

International possibilities

Since you have **Costa Rican heritage** and are fluent in Danish, maybe you are interested in international studies?

- ✓ International Baccalaureate (IB) — offered in some Danish schools.
- ✓ Exchange programs or bilingual education.

 Consider this if:

You want a more global focus, or might study or work abroad later.

How to choose?

Here are some questions that might help:

- Do you enjoy academic subjects and studying, or do you prefer practical, hands-on work?
 - What are your favorite subjects? (e.g., science, languages, business, art, technology)
 - Do you already have an idea of a career you'd like to pursue?
 - Would you like to combine school and work (apprenticeship), or focus mainly on school?
-

My suggestion

 Since you're at a decision point, I recommend:

- **Visit open house events** at local gymnasium and vocational schools.
- **Talk to a guidance counselor (studievejleder)** — they can help you map your interests to the right education.
- **Consider a "brobygning" or trial course** if you're unsure — these are short programs that let you try out a school type.

If you tell me more about your **interests, strengths, and dreams** (e.g. "I love science" or "I want to start a business"), I can give you a more specific recommendation!

Would you like help mapping that out?
