

Uddannelsesvejledning efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Croatia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's awesome that you're already thinking carefully about your next steps! Let's break it down to help you make a thoughtful decision.

Your Situation

- ✓ 16 years old
- ✓ Born and raised in Denmark, fluent in Danish
- ✓ Finished primary school (folkeskolen)
- ✓ Have a multicultural background (Danish/Croatian)

Main Educational Paths After Primary School in Denmark

Since you've finished folkeskolen, here are the typical options:

1 Gymnasiale uddannelser (General upper secondary education)

These prepare you for higher education (university, university colleges, etc.).

- **STX** (Almen studentereksamen) – academic focus (wide range of subjects)
- **HHX** (Higher commercial examination) – business, economics, marketing
- **HTX** (Higher technical examination) – technology, natural sciences
- **HF** (Higher preparatory examination) – shorter, often for students who want to move on to specific higher education paths or need a fresh start

 *Best if:* You think you want to go to university or you enjoy academic subjects (science, humanities, languages, business).

2 Erhvervsuddannelser (Vocational education and training, EUD)

These combine school and apprenticeship, and prepare you for a skilled trade (e.g. electrician, carpenter, hairdresser, chef).

- Usually takes 3-5 years
- Includes practical work and salary during apprenticeship

👉 *Best if:* You enjoy practical work, want to enter the job market faster, or want a combination of school + hands-on experience.

3 **Kombinerede forløb (EUX)**

A combination of vocational training + upper secondary level education. You get both a skilled trade qualification *and* the option to apply for higher education.

👉 *Best if:* You want the best of both worlds — hands-on work + the opportunity to go to university later.

💡 **How to Decide?**

Ask yourself:

- ✅ Do I enjoy school subjects like math, languages, science? → Consider STX, HTX, HHX, or HF
 - ✅ Am I more hands-on, creative, or practical? → Consider EUD or EUX
 - ✅ Do I already have an idea about my dream job? → Choose a path that fits
 - ✅ Do I want to keep my options open for now? → Gymnasiale uddannelser (STX/HTX/HHX) give flexibility
-

🌍 **Other things to think about**

- You're bilingual and multicultural — this could be a strength in HHX (business, international focus), STX (languages, humanities), or HTX (global tech)
 - Your future dreams: Do you want to stay in Denmark? Work internationally? Study at university?
-

🚀 **My Recommendation**

Since you are still exploring options, and unless you have a clear passion for a trade right now:

- ➡ **STX or HHX** could be a great fit to give you a broad education and keep many doors open.
 - ➡ If you like technology or science, **HTX** could be fantastic.
 - ➡ If you're drawn to a practical career, look at **EUX** — it's flexible and valuable.
-

If you want, I can help you:

- ✨ Make a pros/cons list for each path
- ✨ Find specific schools or programs near you
- ✨ Talk about your interests to narrow down the options

Would you like that? 😊
