

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cuba. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's thoughtful of you to consider your next steps carefully! Since you're 16, living in Denmark, and have completed primary school (which I assume means **folkeskolen** or **10th grade**), you have several good options. Let's break them down based on your interests, strengths, and potential goals:

Your Main Educational Options After Primary School in Denmark

Gymnasiale uddannelser (Upper secondary education preparing for university)

- **STX (Almen studentereksamen)** – Broad academic program (sciences, humanities, social sciences).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, and engineering.
- **HF (Højere forberedelseseksamen)** – A shorter (2-year) program, more practical and often for those wanting to move on to specific higher education paths.

 *Recommended if:* You enjoy academic subjects, want to keep many doors open, and are considering university later.

Erhvervsuddannelser (Vocational education & training - VET)

- Combines school learning with hands-on apprenticeships (e.g., carpentry, electrician, chef, healthcare worker).
- Usually starts with a basic course at a technical college (**erhvervsskole**) and then apprenticeship.

 *Recommended if:* You enjoy practical work, want to learn a trade, and are interested in starting a career sooner.

Kombinerede forløb (Combination programs)

- **EUX:** A combination of vocational training and gymnasium level academic subjects — allows you to get both a trade qualification and the option for higher education.

 *Recommended if:* You want both hands-on skills *and* the possibility of going to university later.

☀️ Factors to consider for your choice

✅ What subjects do you enjoy most?

- If you love math, physics, or IT: HTX might suit you.
- If you like languages, history, or literature: STX could be best.
- If you're interested in business and economics: HHX is a good path.

✅ Do you prefer academic work or practical learning?

- Academic = Gymnasiale programs (STX, HHX, HTX, HF)
- Practical = VET or EUX

✅ What's your long-term dream?

- Do you want to go to university?
- Do you want to start working sooner?
- Do you want to work with your hands or in an office?

✅ Your unique background

- Being bilingual or multicultural (Danish and Cuban roots) could be an asset in fields like languages, international business, tourism, diplomacy, or teaching.

✨ My general recommendation:

Since you're fluent in Danish, you have full access to any of these options. If you're still exploring your interests and want to keep as many doors open as possible, **STX** or **EUX** could be excellent.

- **STX** gives you flexibility and time to decide on your future career while covering a broad range of subjects.
- **EUX** is ideal if you like practical work but still want the option for further studies.

💡 Next steps:

👉 Visit the **uddannelsesvejleder (educational counselor)** at your school or municipality (UU-vejledning) — they can help match programs to your profile.

👉 Attend **open house events (åbent hus)** at local gymnasiums and technical schools — see what feels right for you.

👉 Explore the website: ug.dk — it's the official guide for education in Denmark.

If you tell me more about what subjects you like or what career you might be dreaming of, I can help you narrow it down even further! 🚀
