

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cuba. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and it's fantastic that you're reflecting thoughtfully on your next step! In Denmark, after primary school (folkeskolen), you have several solid options depending on your interests, strengths, and future goals. Let me break it down for you and share some recommendations:

Main educational paths after primary school

1 Gymnasiale uddannelser (Upper secondary academic education)

If you like school subjects (like languages, science, social studies) and might want to go to university later:

- **STX (Alment gymnasium)** – A broad academic education. Good if you like a mix of subjects.
- **HHX (Handelsskole)** – Focus on business, economics, and languages.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, and IT.
- **HF (Højere Forberedelseseksamen)** – A 2-year program (instead of 3), more practical and mature student environment.

2 Erhvervsuddannelser (Vocational education and training - EUD)

If you'd rather learn a trade and work more practically (and still have the option to go further later):

- Apprenticeships in areas like carpentry, mechanics, hairdressing, gastronomy, childcare, etc.
- Combines school and on-the-job training.

3 Kombinationsuddannelser

- **EUX** – Combines vocational training + gymnasial level so you can work or study at university later.

Questions to ask yourself

- Do I enjoy academic subjects or do I prefer hands-on/practical work?
- Do I think I want to go to university later?
- Are there specific subjects or industries that interest me (e.g. business, technology, health, design)?
- Do I want to work sooner, or continue full-time study for a few more years?

Recommendation based on what you've shared

Since you're fluent in Danish, born and raised in Denmark, and coming out of primary school:

- ✓ If you enjoy school and think you might want university later → **STX** or **HHX** could be a strong choice.
 - ✓ If you're curious about technology/IT → **HTX** is worth considering.
 - ✓ If you're eager for something more practical but want to keep university doors open → **EUX** could be a great fit.
 - ✓ If you already have a trade or job in mind → **Erhvervsuddannelse (EUD)**.
-

Your Cuban background

Since you have Cuban roots, maybe you have extra strengths in languages, culture, or international perspectives. That could make HHX (with business + language focus) or STX (where you can choose language lines) extra interesting.

✨ Final tip

It's a good idea to:

- Visit **uddannelsesmesser** (education fairs).
 - Talk to a **vejleder (guidance counselor)** at your school or in your kommune.
 - Visit schools on their **informationsaftener (open house evenings)** to get a feel for what suits you.
-

If you want, tell me about your interests (subjects you like, hobbies, dream jobs), and I can give you a more personalized suggestion! 🚀
