

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Czechia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — you're in a great position with many opportunities ahead of you. In Denmark, after finishing **primary school (folkeskole)**, you generally have a few main educational paths to choose from, depending on your interests, strengths, and goals. Here's a breakdown of the most common options and what kind of student they're best suited for:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic programs that prepare you for **higher education (university or professional bachelor's degrees)**.

STX (Almen studentereksamen)

- General and broad.
- Focus on humanities, sciences, and social sciences.
- Great if you're not sure yet what you want to study later.

HHX (Højere handelseksamen)

- Business- and economics-focused.
- Good for future careers in trade, marketing, entrepreneurship, etc.

HTX (Højere teknisk eksamen)

- Technical and science-oriented.
- Ideal if you're into technology, engineering, or natural sciences.

HF (Højere forberedelseseksamen)

- A bit shorter (2 years).
- More flexible, often chosen by students who want a more practical or less stressful route.
- Some HF programs have special focus areas (e.g., healthcare, pedagogy).

🔧 2. Erhvervsuddannelse (Vocational Education and Training - EUD)

If you're more hands-on and want to **learn a trade**, this is a great path. You split time between school and a paid apprenticeship at a workplace.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Healthcare assistant

You can still continue to higher education afterwards via **EUX**, which combines vocational training with general upper secondary subjects.

3. International Opportunities or Exchange

Because of your Czech background and multilingual ability, you might also consider:

- **IB (International Baccalaureate)**: Taught in English, international focus.
- **Exchange programs**: Spend a year abroad during upper secondary education.
- **Czech language courses** to maintain heritage and open cross-border opportunities.

So, what should *you* choose?

Here's a quick self-check:

If you...	Then consider...
Like academic work and may want to go to university	STX / HHX / HTX / HF
Prefer learning by doing and earning while learning	EUD / EUX
Love business, marketing, or sales	HHX
Are into science or engineering	HTX
Like working with people, children, or in healthcare	HF or EUD (social care)
Aren't sure yet and want to keep options open	STX or HF

My suggestion for you:

Since you're fluent in Danish, born and raised in Denmark, but with Czech roots, you have a strong cultural foundation. If you're academically inclined and want to keep your options open, **STX** might be the best first step. It gives you a broad education and keeps the door open for almost any university program later on.

However, if you enjoy **business**, consider **HHX**. If you're more of a hands-on learner, look into **EUX**, so you can get a trade and still qualify for university.

If you want, I can help you choose based on what subjects you like, what you're good at, and what you enjoy doing. Want to go deeper into that?
