

Uddannelsesmuligheder efter Folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Czechia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're reflecting on your next steps — and that you're aware of your background, strengths, and opportunities. Since you've just finished primary school (in Denmark, that typically means **Folkeskole** at around age 15-16), you now have several paths you could consider. I'll outline the main options and provide recommendations depending on your interests and goals.

🎓 Main educational paths after Folkeskole

In Denmark, your next step typically involves upper secondary education:

1 Gymnasiale uddannelser (general upper secondary education)

These are for you if you want to prepare for university.

Options include:

- **STX (studentereksamen)** – broad general education, focus on humanities, science, or social science depending on your choice of line (studieretning).
- **HHX (Higher Commercial Examination)** – focus on business, economics, and international trade.
- **HTX (Higher Technical Examination)** – focus on technology, science, and innovation.
- **HF (Higher Preparatory Examination)** – shorter (2 years), often for older students or those who want a more practice-oriented path to higher education.

2 Erhvervsuddannelser (vocational education and training / EUD)

- If you want to learn a trade or practical skill (e.g. electrician, carpenter, chef, health care worker), and often start working or combining with further study.
- Includes **EUX**, a hybrid where you can get both a vocational qualification and a general upper secondary diploma — good if you want both options open.

💡 How to decide?

Ask yourself:

✓ Do I enjoy academic subjects and want to go to university?

- Then STX, HHX, HTX or HF are good options.
- STX is the most flexible if you're unsure what to study later.

- HHX could suit you if you're interested in business, economics, or international subjects (especially as you have a Czech background and could build on your international profile).
- HTX if you're into technology, science, or design.

✓ **Do I want to learn a profession and maybe work sooner?**

- Then EUD or EUX could be a great fit — especially EUX if you want to keep doors open for higher education later.

✓ **Do I want to combine?**

- EUX is very valuable because it gives you both academic and vocational qualifications.

Your unique background

Since you have Czech roots:

- Consider international angles: languages, trade, diplomacy, EU affairs, etc. — HHX could be a good match.
- You might also consider exchange programs, or international lines at some gymnasiums.

My recommendation

If you like school and want options open for university → **STX** or **HHX** (depending on your interests).

If you're more hands-on → **EUX** is a brilliant choice to combine work and academic future.

If you're unsure → visit open house events (**Åbent Hus**) at local schools to get a feel for what suits you.

 If you tell me more about your **interests** (e.g. science, languages, business, technology, arts, working with people, working with your hands), I can give you a more tailored recommendation! Do you want help exploring specific schools in your area?
