

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Côte d'Ivoire. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps—this is an exciting point in your life! Since you just finished primary school (or what in Denmark is typically **folkeskolen**, which ends at 9th or 10th grade), you have several options depending on your interests, strengths, and long-term goals.

Let's break it down a bit:

🎓 Main educational paths after primary school in Denmark

Here are the most common options:

✅ Gymnasiale uddannelser (general upper secondary education)

If you think you might want to continue to higher education (e.g., university), these are great options. They usually take 3 years:

- **STX (Alment gymnasium)** – Broad academic program with focus on sciences, humanities, and social sciences.
- **HHX (Handelsskole)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, and innovation.
- **HF (Højere forberedelseseksamen)** – Shorter, 2-year program, more practical and aimed at people who want to move on quickly to certain higher education or professional programs.

✅ Erhvervsuddannelser (vocational education and training, VET)

If you want to combine school and apprenticeship (praktik), and go straight into a profession (e.g., electrician, hairdresser, carpenter, chef).

These programs are often 3–4 years depending on the trade.

✅ Kombineret forløb

You can combine VET with gymnasial education in certain programs (eux-uddannelse) so you keep doors open to both work and university.

☀️ What should guide your choice?

Ask yourself:

- Do I like academic subjects (math, science, languages, history)? → Gymnasial uddannelse might be good.

- Do I enjoy practical, hands-on work, creating things, or working with people? → A vocational program might suit you.
- Do I want to study further after upper secondary school (university, academy)? → Gymnasiet or EUX is a safer path.
- Do I already have a dream job in mind? → That could point to a specific education (e.g., chef, engineer, designer).

⚡ Some personal advice given your background

- You're fluent in Danish, which gives you full access to all Danish education opportunities—great!
- If you're interested, your Ivorian heritage could be an advantage in international business, language (French), or cultural sectors.
- Don't feel pressured to choose based on what friends are doing. Focus on what *you* enjoy and want to do every day.
- If you're unsure, visiting **uddannelsesmesser** (education fairs) or doing short internships (praktik) can help.

📌 Suggested next steps

- ✓ Talk to your school's **uddannelsesvejleder** (educational guidance counselor).
- ✓ Visit open house events at gymnasier and vocational schools near you.
- ✓ Check out websites like **ug.dk** where you can take interest tests and explore options.
- ✓ Consider asking people working in fields you're curious about how they got there!

💡 **If you tell me more about your interests (e.g., favorite subjects, hobbies, dream jobs), I can suggest a more specific path!**

Would you like help exploring that?
