

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Côte d'Ivoire. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark and you're fluent in Danish, you're at a natural point to consider your next steps in the Danish education system. Let me break down your main options and help you think about what might suit you best.

Main Educational Paths After Primary School (Folkeskole)

In Denmark, after 9th or 10th grade, you typically choose one of the following:

1. General Upper Secondary Education (STX, HHX, HTX, HF)

These are more academic and prepare you for university.

- **STX (Almen studentereksamen)** – Broad academic focus (languages, science, social studies). Good if you're not sure what you want yet.
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing. Ideal if you're interested in business or entrepreneurship.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and innovation. Good for future engineers or tech careers.
- **HF (Højere forberedelseseksamen)** – Shorter, 2-year program. More direct path to certain types of higher education (e.g. teacher, nurse).

✓ **Good if:** You enjoy schoolwork and want to go to university later.

2. Vocational Education and Training (EUD / EUX)

Prepares you for a job or further education with a mix of school and apprenticeships.

- **EUD (Erhvervsuddannelse)** – Direct route into skilled trades (e.g. electrician, carpenter, chef, healthcare assistant).
- **EUX** – Combines vocational training with general education (like STX), so you can also go to university later.

✓ **Good if:** You like hands-on work or want to learn a skill and maybe start earning earlier.

Questions to Ask Yourself

To help decide, think about:

- **What subjects do you enjoy most?**
 - **Do you like practical or academic learning more?**
 - **Do you want to go to university one day?**
 - **Would you like to start working sooner and earn money while learning?**
-

Bonus: Your Background

Being Danish-born with roots in Côte d'Ivoire gives you a multicultural perspective and language potential. You could consider:

- **International careers** in business, diplomacy, or NGOs.
 - Studying **languages, social studies, or global affairs.**
 - Using your story to inspire or support others – e.g. in **education, social work, or healthcare.**
-

My Recommendation

If you're unsure, but you're motivated and like a mix of learning and future flexibility:

Consider EUX or STX

They both give you a broad education and keep university as an option.

- **EUX** is great if you're practical and want a backup path to higher education.
- **STX** is ideal if you're more academically inclined and still exploring.

If you already have a strong interest (like business, tech, or hands-on work), I can help guide you more specifically.

Would you like help figuring out which interests or subjects you enjoy most? I can guide you through that too.
