

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from North Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important question — it's great that you're already considering your next step carefully! Since you've just finished primary school (or *folkeskole*), in Denmark you have several educational options depending on your interests, strengths, and future goals. Let's break it down:

🎓 Your main options after primary school in Denmark

At 16, you're at the typical age where Danish students choose between:

1 General upper secondary education (*gymnasiale uddannelser*)

- **STX (Studentereksamen):** Broad academic program with focus on humanities, social sciences, and natural sciences. Good if you want to keep doors open for university.
- **HHX (Higher Commercial Examination):** Focus on business, economics, marketing, and international trade.
- **HTX (Higher Technical Examination):** Focus on technology, natural sciences, and technical subjects.
- **HF (Higher Preparatory Examination):** Shorter, more compact 2-year program, often chosen if you want a more practical path or didn't complete 9th grade fully.

2 Vocational education and training (*erhvervsuddannelse, EUD*)

- Combines school with apprenticeship in a company. Prepares you directly for a job (e.g. carpenter, chef, electrician, health worker). You can still go to higher education later (e.g. via *EUX*).

3 Combination path (*EUX*)

- Mix of vocational training + gymnasium-level courses → You get both a trade and eligibility for higher education.

4 Other possibilities

- **Efterskole or højskole** (if you want a year to develop socially or explore interests)
- **International school or IB** (if you're interested in an international education)

🔑 How to choose? Some questions for you

- **What subjects do you enjoy the most?**
(E.g. maths, science, languages, art, history, technology?)
 - **Do you prefer practical, hands-on learning or academic study?**
 - **Do you already have a dream job or field?**
 - **Do you want to go to university later or start working sooner?**
 - **How do you feel about school — do you want to continue in a classroom, or try more practical learning?**
-

My recommendation (general guidance)

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, all doors are open to you.

✓ **If you enjoy academic subjects, want to keep as many options open as possible, and are thinking about university** → Consider **STX**, **HTX**, or **HHX** depending on your interests.

✓ **If you prefer practical learning and are eager to start working or learning a trade** → Consider **EUD** or **EUX** (especially **EUX** if you want to keep university options open).

✓ **If you're unsure or want a fresh start with personal development** → A year at **efterskole** can be a fantastic way to grow and explore.

Special tip as someone with North Korean background

Your bilingual/bicultural background could be a strength in:

- international business (HHX)
 - diplomacy / international relations (STX)
 - language studies (STX or IB)
 - technology / engineering (HTX)
-

If you'd like, I can help you:

- ✓ Explore specific schools or programs near where you live
- ✓ Make a pros/cons list based on your interests
- ✓ Plan a path towards a specific job or university

Would you like to tell me a bit about what subjects or activities you enjoy most? 🚀
