

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Denmark. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's a great point in life to start thinking seriously about your future—well done for doing that already. Since you've just finished primary school (9th or 10th grade in Denmark), you're at a crossroads in the Danish education system. Here are the main options and some tailored advice based on your age, background, and the fact that you're fluent in Danish and born in Denmark:

🎓 Main Education Paths After Primary School in Denmark:

1. Gymnasiale uddannelser (Upper Secondary Education – Academic)

These are ideal if you think you might want to go to university later.

- **STX (Studentereksamen):** Broad academic education, good if you're unsure of your interests.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international studies.
- **HTX (Higher Technical Examination):** Focus on natural sciences, technology, and innovation.
- **HF (Higher Preparatory Examination):** Shorter, 2-year program, more practical and flexible.

Recommended if:

You enjoy school, want to keep options open, and possibly pursue higher education.

2. Erhvervsuddannelser (VET – Vocational Education and Training)

These combine school and apprenticeship, leading directly to a trade or career.

- Examples: Electrician, carpenter, chef, hairdresser, social and health care worker.
- Often includes real work placements (praktik).

Recommended if:

You want to start working sooner, like hands-on learning, or have a specific interest in a trade.

3. Kombinationsforløb / EUX (Both Academic + Vocational)

This lets you combine vocational training with academic education. You can work as a skilled professional or continue on to university.

Recommended if:

You want both practical experience and the option for higher education later.

Things to Consider

- **What are your interests and strengths?**
Do you like science, humanities, business, or working with your hands?
- **Do you want to go to university later?**
If yes, go with STX, HTX, HHX, or EUX.
- **Would you prefer to work sooner and avoid long studies?**
Then VET (erhvervsuddannelser) might be a better fit.
- **Do you learn better by doing or reading/theory?**
VET and EUX are more practical; gymnasiale paths are more theoretical.

A Simple Recommendation Flow:

- **Not sure yet what to do?**
→ Choose **STX** – it's broad and keeps most doors open.
- **You like tech or science?**
→ Choose **HTX** or **EUX Tech**.
- **You're into business, marketing, or finance?**
→ Choose **HHX** or **EUX Business**.
- **You want a career fast and like practical work?**
→ Choose **Erhvervsuddannelse (VET)**.

Final Tip

It's totally okay to not know exactly what you want yet. Try visiting uddannelsesguiden.dk, go to open house events at local schools, and talk to a study counselor (*studievejleder*). Denmark's education system is flexible—changing paths is possible if you later change your mind.
