

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Denmark. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — and it's great that you're thinking carefully about your next step! Since you've just finished primary school (**folkeskole**) in Denmark at around 16, you have several good options depending on your interests, learning style, and career ambitions. Let me break down the main educational paths and offer guidance:

1 Gymnasiale uddannelser (General upper secondary education)

These are good if you're aiming for university later on, or if you want to keep your options open.

- **STX (Studentereksamen):** Broad academic program with focus on humanities, sciences, and social sciences.
- **HHX (Handelsskole):** Focus on business, economics, marketing, and international trade.
- **HTX (Teknisk gymnasium):** Emphasis on technology, natural sciences, and technical subjects.
- **HF (Højere Forberedelseksamen):** Shorter (2 years), more practice-oriented, often for people who want to move on to specific higher education programs or have had a break before continuing.

Recommended if:

You like academic subjects, want to explore different fields, or plan to go to university.

2 Erhvervsuddannelser (Vocational education and training)

Combines school and apprenticeship (praktik) in a company. You earn while you learn.

- **Examples:** Electrician, carpenter, chef, hairdresser, mechanic, IT-supporter.
- Can also lead to further education (fx erhvervsakademi or professionsbachelor).

Recommended if:

You prefer practical learning, want to work with your hands, or are eager to enter the workforce sooner.

3 Kombinerede eller alternative tilbud

- **EUX:** Mix of vocational and academic education — you get both a vocational qualification and a studentereksamen (great if you want to keep university as an option).

- **Efterskole (if you want a year to mature and explore interests):** Many 16-year-olds choose this as a bridge year.
 - **International schools or IB:** If you're interested in international study or career paths (but you mention fluency in Danish, so probably not needed unless you want that global angle).
-

Questions to help you decide

- Do you enjoy classroom learning, or do you prefer hands-on work?
 - Are you already passionate about a particular subject or career?
 - Do you want to go to university, or are you more eager to start working?
 - Would you like to take a year at an efterskole to develop personally and socially before choosing?
-

My suggestion

Since you're fluent in Danish and completed primary school here:

- ✓ If you want to keep your options open: **STX** or **EUX** could be great.
 - ✓ If you are drawn to business: **HHX**.
 - ✓ If you like technology and sciences: **HTX**.
 - ✓ If you are eager for a practical job and earning early: **Erhvervsuddannelse** or **EUX**.
-

If you tell me more about what subjects you like, what hobbies you have, or what careers you're considering, I can give you a more tailored recommendation! Would you like help with that? 😊
