

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Djibouti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — it's great that you're thinking carefully about your future! Since you've finished primary school (in Denmark that means **folkeskolen**, typically at the end of 9th or 10th grade), you have several options depending on your interests, strengths, and what kind of future you imagine for yourself. Let's break it down clearly:

☀ Main educational options after primary school in Denmark

Here's a quick overview:

1 Gymnasiale uddannelser (Upper secondary education)

These are for you if you enjoy academic subjects and might want to go to university later. You can choose:

- **STX (Alment gymnasium)** – General upper secondary school, broad range of subjects.
- **HHX (Handelsskolen)** – Focus on business, economics, international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, science, IT.
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), more practical and adult-focused, good if you want to switch faster to job or university.

👉 **Good if:** You like school subjects (Danish, English, science, math, etc.), and may want to continue at university later.

2 Erhvervsuddannelse (Vocational education and training, EUD)

This path combines school with apprenticeship/work in a company.

- You can become e.g. electrician, carpenter, hairdresser, chef, social and health care assistant (SOSU), mechanic, etc.
- You earn money during the apprenticeship part.

👉 **Good if:** You prefer practical work, learning by doing, and want to work earlier.

3 Kombinerede forløb

- **EUX** – Combines vocational education and gymnasium-level subjects, so you can both work in a trade and go on to university.
- **10. klasse** – If you want an extra year to mature, improve your grades, or figure out what you want.

✨ How to decide?

Since you are:

- ✓ 16 years old
- ✓ Fluent in Danish
- ✓ Finished primary school

I would recommend asking yourself:

- Do I prefer academic studies or practical learning?
- Do I want to go to university later, or do I want to start working earlier?
- What subjects excite me? (e.g. science, languages, technology, business, design, healthcare)

📌 Possible paths based on different interests

If you like...	Consider...
Languages, humanities, social studies	STX
Business, marketing, trade	HHX
Science, technology, IT	HTX
Hands-on work, crafts, mechanics	EUD (with or without EUX)
Health, care for others	EUD (SOSU)
Not sure yet	10. klasse (or STX/HHX/HTX general line)

✓ Next steps

- 👉 Visit your local **UU-vejledning** (Ungdommens Uddannelsesvejledning) — they can give you personal advice.
- 👉 Visit open house days at gymnasiums or vocational schools — get a feel for them.
- 👉 Talk to friends, teachers, family.

If you'd like, I can help:

- Suggest specific schools in your area.
- Create a pros/cons list for the options you're considering.
- Help you explore what career paths match your strengths.

Would you like that? And do you already have some ideas about what you might want to study or work with? 😊
